Computerworld 1975-06-18

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Tutorial, Computer System Requirements Kenneth J.

Thurber 1980 This tutorial developed over a number of years, during an engineering career wherein the author encountered 'systems design' that appeared to contain no design whatsoever. Regardless of design goals, processes, or requirements, it appeared that in corporate America, it was the job of marketing departments to designate the requirements satisfied by the end product. This collection of articles presents a straw man strategy to help avoid ad-hoc designs, and to answer the questions and develop the ideas that lead to concrete, a-priori requirements for systems design.
