The Alternative Investment Fund Managers Directive Dirk A. Zetzsche 2015-09-14 Apart from MiFID, the Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early twenty-first century. In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: - connection with systemic risk and the financial crisis; - nexus with insurance for negligent conduct; - connection with corporate governance doctrine; - risk management; - transparency; - the cross-border dimension; - liability for lost assets; - impact on alternative investment strategies, and - the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers

all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

Solution Protocols to Festering Island Disputes Godfrey Baldacchino 2017-04-28 Since the coming into force of the United Nations Law of the Sea, states have been targeting outlying islands to expand their exclusive economic zones, simultaneously stirring up strident nationalism when such plans clash with those of neighbouring states. No such actions have brought the world closer to the brink of war than the ongoing face-off between China and Japan over the Diaoyu/Senkaku islands, an uninhabited archipelago in the East China Sea. In this timely and original book, Godfrey Baldacchino provides a detailed exploration of seven tried and tested solution protocols that have led to innovative 'win-win' solutions to island disputes over the last four centuries. A closer look at the circumstances and processes that brought contending regional powers to an honourable, even mutually advantageous, settlement over islands provides a convincing and original argument as to why the conflict over the Diaoyu/Senkaku islands need not conclude in a 'zero-

sum' or 'winner takes all' solution, as is the likely outcome of both open conflict and international arbitration. The book will be of interest to scholars and practitioners concerned with the festering Diaoyu/Senkaku dispute, as well as students, scholars and policy specialists in geography, geopolitics, international relations, conflict studies, island studies, Asian studies and history.

Understanding African Real Estate Markets Aly Karam 2022-04-28

This book brings together a broad range of research that interrogates how real estate market analysis, finance, planning, and investment for residential and commercial developments across the African continent are undertaken. In the past two decades, African real estate markets have rapidly matured, creating the conditions for new investment opportunities which has increased the demand for a deeper understanding of the commercial and residential markets across the continent. The chapters consider issues that pertain to formal real estate markets and the critical relationship between formal and informal property markets on the continent. With contributing authors from South Africa, Ghana, Nigeria, Uganda, Kenya, and Tanzania, the book considers the achievements of African real estate markets while also highlighting the complex central themes such as underdeveloped land tenure arrangements, the availability of finance in both the commercial and residential sectors, rapidly growing urban areas, and inadequate professional skills. This book is essential reading for students in real estate, land management, planning, finance, development, and economics programs who need to understand the nuances of markets in the African context. Investors and policy makers will learn a lot reading this book too.
