Teaching Islamic Studies in the Age of ISIS, Islamophobia, and the Internet Courtney M.

Dorroll 2019-01-24 How can teachers introduce Islam to students when daily media headlines can prejudice students' perception of the subject? Should Islam be taught differently in secular universities than in colleges with a clear faith-based mission? What are strategies for discussing Islam and violence without perpetuating stereotypes? The contributors of *Teaching Islamic Studies in the Age of ISIS*,

Islamophobia, and the Internet address these challenges head-on and consider approaches to Islamic studies pedagogy, Islamophobia and violence, and suggestions for how to structure courses. These approaches acknowledge the particular challenges faced when teaching a topic that students might initially fear or distrust. Speaking from their own experience, they include examples of collaborative teaching models, reading and media suggestions, and ideas for group assignments that encourage deeper engagement and broader thinking. The contributors also share personal struggles when confronted with students (including Muslim students) and parents who suspected the courses might have ulterior motives. In an age of stereotypes and misrepresentations of Islam, this book offers a range of means by which teachers can encourage students to thoughtfully engage with the topic of Islam.

Pilates Applications for Health Conditions

Volume 2 Madeline Black 2025-05-08

Movement is recognized as a positive contributor to lengthening health span and supporting vitality. However, optimal movement practices for the individual needs of different health conditions have not yet been thoroughly explored. The second volume of this pioneering book examines locomotor system health conditions, including scoliosis, kyphosis, hip joint dysfunction, diastasis recti abdominis, and congenital muscular torticollis, illustrating in detail how movement sequences improve gait, balance, efficiency, and quality of life. Each chapter is an exemplar of how to tailor

movement practices to specific situations, while providing actionable information to movement and health practitioners in clinical practice, movement centers, home practice and online sessions. A comprehensive reference designed for Pilates teachers, movement educators, manual therapists, continuing education providers and teachers-in-training advances professional efficacy. Expert contributors integrate the movement vocabulary of J.H. Pilates with influences from current interdisciplinary methodologies and research. For a buoyant experience that increases somatic engagement intersperse reading with movement practices.

Railway Review 1891

Teaching Economics Joshua Hall 2019-08-07

This book looks at a number of topics in economic education, presenting multiple perspectives from those in the field to anyone interested in teaching economics. Using anecdotes, classroom experiments and surveys,

the contributing authors show that, with some different or new techniques, teaching economics can be more engaging for students and help them better retain what they learned. Chapters cover a wide range of approaches to teaching economics, from interactive approaches such as utilizing video games and Econ Beats, to more rigorous examinations of government policies, market outcomes and exploring case studies from specific courses. Many of the chapters incorporate game theory and provide worked out examples of games designed to help students with intuitive retention of the material, and these games can be replicated in any economics classroom. While the exercises are geared towards college-level economics students, instructors can draw inspiration for course lectures from the various approaches taken here and utilize them at any level of teaching. This book will be very useful to instructors in economics interested in bringing innovative teaching methods into the classroom.

Supporting Teachers' Formative Assessment Practice with Learning Progressions Erin

Furtak 2017-10-05 This book presents the results of a four-year, National Science Foundation-funded project that engaged nine high school biology teachers at three public high schools in long-term, on-site professional development program centered on a learning progression. It explores the influence of teacher participation in this professional development experience on their learning about student thinking, formative assessment task design,

classroom practices, and student learning.

Taking an in-depth look at the multiple sources of data gathered as part of the study, this volume reflects on the emergence of professional communities focused on formative assessment design and enactments and associations between teacher participation in learning progression-centered professional development and student learning.
