Budgeting Nils H. Rasmussen 2000-10-02

Essential Budget Planning for the 21st Century Corporation Today's corporations are more competitive, dynamic, and, consequently, more powerful and successful than ever before. As a

result, the days when corporate budgeting was merely an obligatory, routine process of estimating the coming year's revenues and expenses have long ended. Successful corporations are constantly improving their ability to predict their future operations and their related resource requirements, enabling them to adjust their plans as needed and stay ahead of the competition. Not only does this heighten the importance of the budgeting and planning process, but it also changes the traditional roles of spreadsheets, legacy budget systems, and software created in-house. Budgeting shows corporations how to achieve and maintain their edge through modern budgeting systems and the use of good budgeting software. This book provides comprehensive guidance through the range of considerations that are crucial to streamlining the budget planning process: * What corporations should be looking for when buying or building a new budgeting solution * How to

select the right budgeting solution from the field of vendors * How to successfully implement a new budgeting solution * How to fully utilize the Web . . . plus helpful lists and questionnaires, and interviews with managers from leading companies who have effectively created internal processes and implemented software solutions. Equip your corporation to excel in the twenty-first century with the tools and information offered in this invaluable resource.

How to Write Winning Proposals for Your Company Or Client Ron Tepper 1989-01-17

Among these outstanding writers/presenters are: Don Kracke, an advertising and marketing executive whose private sector proposals have

resulted in millions of dollars of business from more than 30 major U.S. corporations Carol Geisbauer, who runs a tiny, community-based local organization and gets more than 20 out of every 25 public grants funded each year simply by following her "technical/political" format in approaching RFPs Jay Abraham, one of the few proposal writers who specializes in cold calling and selling with "proposal/letters" In this book, these three proposal writers and 16 others show you that writing a proposal is more than just answering a request. It is obtaining insight into what the prospective client/company/government agency really wants. You'll learn: The advantage of the "laundry list" approach in private sector proposals How to get decision makers on your side before the decision The inside approach to the two most common proposals submitted to government agencies-- RFPs (Request for Proposal) and RFQs (Request for Quotation) How to plan and prepare the graphics, format, style, and language of a

written proposal The ideal length and content for a verbal proposal and when you should make one The psychology, format, and language for internal/external proposals
