Guide to Damages in International

Arbitration John A Trenor 2016-11-05 Global Arbitration Review's The Guide to Damages in International Arbitration is a desktop reference work for those who'd like greater confidence when dealing with the numbers. The guide, edited by John A. Trenor of Wilmer Cutler Pickering Hale and Dorr LLP, covers all aspects of damages - from the legal principles applicable, to the main valuation techniques and their mechanics, to industry-specific questions, and topics such as tax and currency. For each of the major methodologies employed by damages experts the book describes the basics of the approach, the areas of general agreement, and the points at which consensus can break down. The book acts as a compass for non-accountants and non-economists, enabling them to argue or umpire the damages part of cases more

effectively. This guide contains 27 chapters, sectioned into four parts: I. Legal Principles Applicable to the Award of Damages II. Procedural Issues and the Use of Damages Experts III. Approaches and Methods for the Assessment and Quantification of Damages IV. Industry-Specific Damages Issues. Contributors include top names at organisations like White & Case LLP, Freshfields Bruckhaus Deringer LLP, PricewaterhouseCoopers LLP and Victoria University. 'The Global Arbitration Review Guide to Damages in International Arbitration covers most issues likely to be faced by arbitrators, counsel and experts. The twenty-six chapters are written by experts in their respective fields. Their advice is down to earth and practical. The Guide fulfills the aim described by John Trenor in his Introduction: " to make the subject of damages in international arbitration more understandable and less intimidating for arbitrators and other participants in the field and to help participants present these issues

more effectively to tribunals."- Anthony Connerty, Barrister in practice, IDR Group and 4-5 Gray's Inn Square

The Regulation of International Commercial Arbitration João Ilhã Moreira 2024-07-25 This book addresses how the regulation of international commercial arbitrators takes place. International commercial arbitrators are a unique category of service providers because they are not organised as other professionals such as accountants, lawyers and doctors. The book provides an overview of how and why the regulation of international commercial

arbitrators diverged from that of other professions. It also argues that, despite these differences, there is an effective regulatory environment overseeing the behaviour of international commercial arbitrators. The book unpicks the different elements that contribute to the creation and enforcement of professional norms in this field. It explains how the specific characteristics of the arbitral market create strong incentives for ethical norms to be created, even in the absence of the institutions that usually address these issues in other fields. It also describes how market and social forces drive arbitrators to comply with these norms in most circumstances. Finally, the book addresses the ways in which this regulatory system also explains some of the perceived weaknesses of arbitration, namely the rising costs of proceedings and the perceived unfairness of appointments.
