Adaptive Instructional Systems Robert A. Sottolare 2023-07-08 This book constitutes the refereed proceedings of the 5th International Conference, AIS 2023, held as part of the 25th International Conference, HCI International 2023, which was held virtually in Copenhagen, Denmark in July 2023. The total of 1578 papers and 396 posters included in the HCII 2023 proceedings was carefully reviewed and selected from 7472 submissions. The AIS 2023 proceeding helps to understand the theory and enhance the state-of-practice for a set of technologies (tools and methods) called adaptive instructional systems (AIS). AIS are defined as artificially intelligent, computer-based systems that guide learning experiences by tailoring instruction and recommendations based on the goals, needs, preferences, and interests of each individual learner or team in the context of domain learning objectives.

Statistics and Probability, Grade 4 Jennifer Lawson 2007-12-07 This module focuses on different strategies to collect and organize data, interpreting the information, and using it to draw conclusions and extending the information. Students are introduced to the concept of "many-to-one-correspondence" for presentation and interpretation of data, and learn to read information in one format and transfer it to a different graphic organizer or tool. As well, student have the opportunity to use technology to create data management presentations. Also included: materials lists; activity descriptions; questioning techniques; problem-solving examples; activity centre and extension ideas; assessment suggestions; and activity sheets and visuals. All modules include a list of children's books and websites related to the mathematics topics introduced, a detailed introduction to the Hands-On Mathematics program (guiding principles, implementation guidelines, an overview of the skills that students use and develop during mathematics inquiry), and a classroom assessment plan and record-keeping templates. Advances in Quantitative Methods for Economics and Business Salvador Cruz Rambaud 2025-09-26 Bringing together a distinguished group of contributors, this volume in honor of José García Pérez provides a comprehensive overview of the latest advances in quantitative methods for business and economics, including distribution theory, econometrics, behavioral finance, financial networks and economic applications, as well as parallels exploring José García Pérez's research interests. Contemporary challenges in this field include evaluating the robustness of structural econometric analyses under collinearity, identifying the connections between long-term memory and financial performance, and treating multicollinearity in the Nelson-Siegel model. To tackle these problems, this book offers a wealth of innovative approaches, methodologies, and theoretical frameworks. For example, it presents new probability distributions, explores the application of partial least structural equation modeling in economics, discusses the theoretical-practical approach to portfolio management in sustainable finance and Environmental, Social and Governance, and reviews the application and usefulness of state-of-the-art machine learning and artificial intelligence in applied finance. The book serves as a valuable resource for researchers and practitioners in econometrics, finance, and economics, providing a comprehensive yet

accessible resource for further exploration and study. In honoring José García Pérez, it not only pays tribute to a distinguished scholar but will also act as a catalyst for continued exploration and advancement in the dynamic and evolving landscape of quantitative methods for economics and business.

Essential Statistics Robert Gould 2021 "This book is about understanding how statistical inference and data analysis can improve the world by helping us see more clearly"--

Elementary Statistics: Looking at the Big Picture Nancy Pfenning 2010-01-01 Using a successfully class-tested approach that gives coherence to a broad range of introductory topics, this innovative text provides students with a real-world, big picture view of statistics as well as problem-solving strategies that can be applied to the statistical questions, real data, and examples that they will encounter. Author Nancy Pfenning organizes content around four basic processes of statistics: producing data, displaying and summarizing data, understanding probability, and using probability to perform statistical inference. Within this framework, the book progresses systematically through five basic problem situations involving values of variables (quantitative, categorical, or a blend). As a result, students learn to identify which situation applies and how to choose the correct display, summary, or inference tool or technique. As students gain proficiency in specific statistical techniques, the author also points out connections among topics and techniques. More than 1,000 real-life examples and categorized exercises support the approach, engaging students in practicing and developing a variety of skills. Current Research On Spin Glasses Stefan Boettcher 2025-03-27 Fifty years after the discovery of transition-like behavior in randomly-dilute magnetic alloys, the spin-glass state is still not fully understood.

Interpreting spin-glass behavior is of practical importance for understanding cooperative behavior in random systems, and fundamental interest for insight into complexity that occurs across multiple times and spatial scales. In recent years, great strides have been made towards clarifying the spin-glass problem utilizing novel experimental techniques, detailed simulations of microscopic models, and analytical analyses of mean-field and scaling theories. Our goal is to collect recent developments in the general area of spin-glass-like behavior into a review that can guide future progress. Specifically, we plan to assemble a range of recent studies from diverse disciplines to provide up-to-date insight into the behavior of complex systems. The volume is expected to contain a series of papers that can provide readily accessible (open access) content from top researchers in the field.
