*China's Free Trade Agreement Strategies* Francine Hug 2024-12-04 This book delves into the intriguing paradox of China's position in international trade law. Although China is an active member of the World Trade Organisation (WTO) engaging in substantial trade, tensions with trading partners may also arise. In this context, the book explores the legal principles informing Chinese Free Trade Agreements (FTA) and aims to answer the pivotal question: What drives China's FTA strategies? With unique analytical methods and a novel theoretical framework, this book sheds light on China's FTA strategies, challenging prevailing notions about State intervention in the economy and offering a nuanced perspective on China's position in the world trading system. By exploring how Chinese FTAs align with developmental State and socialist market economy principles, the book contributes significantly to the fields of international economic law generally, and Chinese law specifically. Readers, especially those interested in international trade law and China's economic policies, will benefit from gaining a deeper understanding of the principles guiding China's FTA strategies and their contrast with leading liberal regimes like the WTO, the United States, and the European Union. This thought-provoking and pioneering book presents a fresh perspective on China's role in the global trade landscape. It is thus an essential resource for anyone curious about the interaction between China's distinctive political economy and the transforming international economic order.

**World Development Indicators 2005** 2005-01-01 World Development Indicators was launched in 1978 to give a statistical snapshot of the progress being made on a range of economic and social development issues and the challenges remaining, both at national level and aggregated globally. The 2005 edition of this annual publication includes over 80 tables and 800 indicators for 152 economies and 14 country groups, together with basic indicators for a further 55 economies, organised under six thematic headings, including the progress made towards achieving the Millennium Development Goals. Indicators cover a wide range of topics including poverty and inequality, population and migration, gender issues, health and education, housing and urbanisation, environment and sustainable development, pollution, the economy and trade, business and investment conditions. Most of the statistics are compiled from data provided by national statistical agencies. The publication is also available in CD-ROM formats for single-users (ISBN 0821360728) and multi-users (ISBN 0821360736).

*The Sage Handbook of Nursing Education* Carol Hall 2024-05-01 In the past several years, a revival of research devoted to nursing education has emerged. This emergence has changed the way many educators engage in their practice of working with learners; and learners have come to expect that they will have a rich learning experience designed to develop new (or enhance prior) knowledge, skills, and attitudes. The SAGE Handbook of Nursing Education provides a detailed map of the current discipline, with a carefully selected team of international contributors offering the latest thinking about education in nursing across key areas. This handbook will be a key resource for academic educators, as well as graduate and postgraduate learners.

Handbook of Research on Library Response to the COVID-19 Pandemic

Holland, Barbara 2021-03-19 Since the spread of COVID-19, conferences have been canceled, schools have closed, and libraries around the world are facing difficult decisions on which services to offer and how, ranging from minimal restrictions to full closures. Depending on the country, state, or city, a government may have a different approach, sometimes ordering the closure of all institutions, others indicating that it's business as usual, and others simply leaving decisions up to library directors. All libraries worldwide have been affected, from university libraries to public library systems and national libraries. Throughout these closures, libraries continue to provide services to their communities, which has led to an emerging area of research on library services, new emerging technologies, and the advancements made to libraries during this global health crisis. The Handbook of Research on Library Response to the COVID-19 Pandemic consists of chapters that contain essential library services and emerging research and technology that evolved and/or has continued during the COVID-19 pandemic, as well as the challenges and opportunities that have been undertaken as a result. The chapters provide in-depth research, surveys, and information on areas such as remote working, machine learning, data management, and the role of information during COVID-19. This book is a valuable reference tool for practitioners, stakeholders, researchers, academicians, and students who are interested in the current state of libraries during a pandemic and the future outlook.
