

Cold War Conflicts Guide Answer

Post-Cold War Conflict Deterrence National Research Council 1997-04-02 Deterrence as a strategic concept evolved during the Cold War. During that period, deterrence strategy was aimed mainly at preventing aggression against the United States and its close allies by the hostile Communist power centers—the Union of Soviet Socialist Republics (USSR) and its allies, Communist China and North Korea. In particular, the strategy was devised to prevent aggression involving nuclear attack by the USSR or China. Since the end of the Cold War, the risk of war among the major powers has subsided to the lowest point in modern history. Still, the changing nature of the threats to American and allied security interests has stimulated a considerable broadening of the deterrence concept. Post-Cold War Conflict Deterrence examines the meaning of deterrence in this new environment and identifies key elements of a post-Cold War deterrence strategy and the critical issues in devising such a strategy. It further examines the significance of these findings for the U.S. Navy and Marine Corps. Quantitative and qualitative measures to support judgments about the potential success or failure of deterrence are identified. Such measures will bear on the suitability of the naval forces to meet the deterrence objectives. The capabilities of U.S. naval forces that especially bear on the deterrence objectives also are examined. Finally, the book examines the utility of models, games, and simulations as decision aids in improving the naval forces' understanding of situations in which deterrence must be used and in improving the potential success of deterrence actions.

Election Interference Jens David Ohlin 2020-07-16 Russian interference in the 2016 US presidential election produced the biggest political scandal in a generation, marking the beginning of an ongoing attack on democracy. In the run-up to the 2020 election, Russia was found to have engaged in more “information operations,” a practice that has been increasingly adopted by other countries. In *Election Interference*, Jens David Ohlin makes the case that these operations violate international law, not as a cyberwar or a violation of sovereignty, but as a profound assault on democratic values protected by the international legal order under the rubric of self-determination. He argues that, in order to confront this new threat to democracy, countries must prohibit outsiders from participating in elections, enhance transparency on social media platforms, and punish domestic actors who solicit foreign interference. This important book should be read by anyone interested in protecting election integrity in our age of social media disinformation.

Coping with Conflict After the Cold War Edward A. Kolodziej 1996 'This intriguing book develops the thesis that Soviet-American competition in the past four decades actually imposed constraints on the Cold

War that kept it from turning hot... The end of the Cold War—since this book was written—only served to make this excellent book more valuable.' -Foreign Affairs

Cinematic Cold War Tony Shaw 2010 The first book-length survey of cinema's vital role in the Cold War cultural combat between the U.S. and the USSR. Focuses on 10 films—five American and five Soviet, both iconic and lesser-known works—showing that cinema provided a crucial outlet for the global "debate" between democratic and communist ideologies.

International Conflict Resolution After the Cold War National Research Council 2000-12-07 The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? *International Conflict Resolution After the Cold War* critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

Restructuring the Global Military Sector: New wars Mary Kaldor 1997 Since the mid-1980s there have been substantial cuts in military spending everywhere except Pacific Asia. The reasons are both political, such as the end of the Cold War, democratization in Africa and Latin America, and economic, with structural adjustment programmes, debt and cuts in public spending. This is the first volume of a study by the United Nations University to investigate the changes taking place world-wide in armed forces, arms industries and all other military-related activity. The main conclusion of the study is that a fundamental transformation is taking place in the nature of warfare. It argues that recent wars arose from the disintegration of state structures. Participation in wars is low, compared with earlier wars, as are casualties. However, the new wars are very disruptive in social terms. The book argues that it is possible to identify a certain logic to the new wars which can be analyzed so as to provide a basis for alternative forms of conflict prevention and resolution.
