Research Handbook on International Marine Environmental Law

Rosemary Rayfuse 2023-01-20 This wholly new edition of the Handbook provides an authoritative examination of international law relating to the protection of the marine environment. Chapters critically engage with current legal issues surrounding activities that harm the marine environment, including marine pollution, seabed activities, exploitation of marine biodiversity and climate change, and with the different legal tools and mechanisms, including environmental impact assessments and compliance and dispute settlement mechanisms, used to protect the marine environment. New chapters also address legal issues relating to the role of technology and marine scientific research as well as the application of principles such as public participation. This title contains one or more Open Access chapters.

Routledge Handbook of Wetlands Alan Dixon 2025-08-29 This handbook

provides a comprehensive and interdisciplinary overview of the place, value and significance of wetlands, presenting perspectives from across the environmental and social sciences. Recent decades have witnessed unprecedented global interest in wetlands and the critical role they play in supporting biodiversity and ecosystem services such as carbon storage, flood mitigation, as well as their direct benefits for people and society that include the provision of food, clean water and a range of cultural services. This Routledge Handbook of Wetlands brings together a wide range of perspectives from social and environmental disciplines, and voices from different wetland stakeholders from the global north and south, to present an assessment of our current understanding of wetlands, their environmental significance, and their place in society and policy. A recurring theme of the book is an exploration of how our current knowledge of wetlands, that is often fragmented along traditional disciplinary lines, can be brought together to enable a more integrated, interdisciplinary and social-ecological conceptualisation that aligns more closely with real-world complex challenges, and which offers new directions in wetland management for sustainable development. This handbook will be essential reading for students and scholars of wetland management, environmental science, water resource management, conservation ecology, environmental humanities and sustainable development.

Textbook For Environmental Laws - Part 2 Dr. Shaikh Ahmad Shaikh Ismail The book extensively covers the law relating to this field along with necessary international conventions and Jurisprudence evolved by the Indian Judiciary and is a useful reference for practicing lawyers, academicians, law students, social activists and researchers. The Environmental Law in India is a comprehensive and exhaustive publication on the field of Environmental Law. The Book exhaustively deals with the constitutional mandate for environmental protection, judicial review of decisions.

International Watercourses Law and Multilateral Environmental Agreements Yang Liu 2024-02-06 This book anchors its arguments in Article 20 of the Watercourses Convention and explores consistencies and inconsistencies in parallel definitions, substantive and procedural obligations and institutional arrangements in IWL, and the Ramsar and Biodiversity Conventions with respect to the protection and preservation of ecosystems of shared inland waters. Dr. Yang Liu argues that the all-around informed and integrated application of IWL and MEAs is essential for the effective protection and preservation of shared inland water ecosystems. However, the degree of cross-fertilization of parallel provisions should be examined on a case-by-case basis in light of the legal analytical framework deployed in this study.
