EU Civil Service Law Oliver Mader 2024-07-25 "Since reading [the book], I have been enthusiastic and impressed by it ... It will undoubtedly be of great use to all staff employed by the EU institutions and agencies interested in knowing their rights and obligations in EU Civil Service Law, as well as to interested practitioners for finding their way into this thrilling area of EU law." Jan Inghelram, Director, Legal Adviser on Administrative Matters of the Court of Justice of the European Union (from the Foreword to the book) This practical commentary interprets EU Staff Regulations on the basis of a rich set of judgments handed down by the EU courts over more than 70 years, complemented by insightful case studies on recent landmark decisions. In addition to presenting key aspects of employment law applicable to officials and other agents of the EU institutions, the book considers future legal developments. Several important areas of Union law meet in the practice of civil service matters: fundamental rights; general principles of EU law; social and labour law; family and tax law; and procedural, administrative, institutional and constitutional law. Mader explores this intersection across chapters covering civil service law context, its legal framework and interpretative principles; it covers procedural and substantial EU civil service law and closes with a chapter on collective EU civil service law. The result is an invaluable English-language commentary by one of the field's leading figures, written for all staff employed by EU institutions (and similar bodies) and for all organisations that apply and interpret EU civil service law, as well as for colleagues working across EU law, civil service and public sector law.

Assessing Negative Response Bias in Competency to Stand Trial Evaluations Steven J. Rubenzer 2018-03-22 Assessing Negative Response Bias in Competency to Stand Trial Evaluations provides readers with a comprehensive guide to assessing whether a defendant has feigned mental impairment during a competency to stand trial evaluation, or simply did not put forth his/her best effort. This book reviews the literature on assessing feigning and negative response bias, with particular focus on issues, tests, and data relevant to CST evaluations, and examines proposed criteria and statistical methods of determining and classifying assessment results. It introduces readers to aspects of the vibrant neuropsychological response style literature, an area many forensic psychologists appear to have overlooked. Additionally, it offers recommendations for research and policy regarding the parameters of CST assessment.
