Smith presents the turkey in ten courses, beginning with the bird itself (actually, several species of it) in the wild. The Turkey subsequently includes discussions of practically every aspect of the icon, including its arrival in early America, how it came to be called "turkey," its domestication and mating habits, the expansion of the bird's territory into Europe, conditions in modern turkey processing plants, and the surprising boom-or-bust cycles in turkey husbandry. The bird's ascension to holiday mainstay - and the techniques of stuffing - are also discussed." "As one of the easiest foods to cook, the turkey's culinary possibilities have

been widely explored if little noted. The second half of this book is a collection of more than a hundred historical and modern turkey recipes from across America and Europe."--BOOK JACKET.

The Fine Arts International Art Association 1900 *Representing Italy Through Food* Peter Naccarato 2017-03-09 Italy has long been romanticized as an idyllic place. Italian food and foodways play an important part in this romanticization - from bountiful bowls of fresh pasta to bottles of Tuscan wine. While such images oversimplify the complex reality of modern Italy, they are central to how Italy is imagined by Italians and non-Italians alike. *Representing Italy through Food* is the first book to examine how these perceptions are constructed, sustained, promoted, and challenged. Recognizing the power of representations to construct reality, the book explores how Italian food and foodways are represented across the media - from literature

to film and television, from cookbooks to social media, and from marketing campaigns to advertisements. Bringing together established scholars such as Massimo Montanari and Ken Albala with emerging scholars in the field, the thirteen chapters offer new perspectives on Italian food and culture. Featuring both local and global perspectives - which examine Italian food in the United States, Australia and Israel - the book reveals the power of representations across historical, geographic, socio-economic, and cultural boundaries and asks if there is anything that makes Italy unique. An important contribution to our understanding of the enduring power of Italy, Italian culture and Italian food - both in Italy and beyond. Essential reading for students and scholars in food studies, Italian studies, media studies, and cultural studies.

Architourism Joan Ockman 2005 This sumptuously illustrated book looks at why the world's most interesting buildings are becoming the hottest destinations for today's travelers. In the last few decades architecture has become a major focus for travelers, rather than merely a part of a larger itinerary. Illustrated with nearly one hundred color photographs, this series of provocative essays and contributions by leading scholars, critics, architects, and artists explores the role of architecture in the contemporary tourist imagination. From Mont Saint Michel and the Taj Mahal to Bilbao's Guggenheim Museum and the Blur Building in Switzerland's Lake Neuchâtel, the authors focus on how certain iconic buildings have found their way into the

cultural consciousness. At the same time they offer insights as to why other buildings, such as Minnesota's Mall of America and the faux architecture of Las Vegas, have become integral to their regions' tourist economy-and postulate how this success will influence architecture of the future.
