Classic Motorcycle Electrics Manual James Smith

2015-08-31 Even the most hands-on of classic bike

enthusiasts will often shy away from working on their bike's electrical system, believing they have neither the skill nor the knowledge for such work. Dr James Smith explains in *Classic Motorcycle Electrics Manual* that this need not be the case. Starting with basic electrical theory, the book demonstrates a wealth of electrical tips and techniques, providing a progressive and detailed guide to tasks ranging from simple repairs and upgrades, through to completely rewiring a classic motorcycle. Illustrated profusely with full-colour photographs and easy-to-following wiring diagrams, this book will be an invaluable resource for all classic bike owners and restorers.

Runways & Racers Terry O'Neil 2022-02-07 *Runways and Racers* concentrates on the short transitional period, 1952-1954, for sports car racing in America following the ban on public road racing in

many of the States. The ban left the rapidly expanding Sports Car Club of America with a problem: where to hold races. At precisely the same time, Curtis LeMay, head of Strategic Air Command, was having problems obtaining funds from Congress to improve conditions on the many air bases located around the country. The solution was a marriage of convenience, whereby the SCCA was allowed access to active SAC air bases to hold its race programmes. In return, the SAC base would receive the net profits from the event, which would be put into the Airmen's Living Improvement Fund. As a result of some initial financial success for the SAC bases, the scheme was also adopted by non-SAC bases together with regional clubs, with the same agreement in place. Complaints from airmen alerted Congressman Errett Scrivner to potential irregularities, and he ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races.

His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.

Vincent Motorcycles Philippe Guyony 2021-10-28 Very few motorcycles have carved a mark in history like the Vincent V-twin, from its arrival in 1946 and up to the present day. On the road, in club racing, in drag races, or competing for land speed records, it dominated the motorcycle world, leading to the famous catchphrase coined by the factory: "The World's Fastest Standard Motorcycle." It was a FACT - NOT a slogan. Images such as that of Rollie Free, in swimming trunks, laying flat on his works-modified Black Shadow and taking the American motorcycle land speed record at Bonneville in 1948, have now passed into posterity. In fact, the big Vincent was so ahead of its

time, that it continued to compete successfully - almost arrogantly - in racing until the mid-1970s, against modern bikes. No other motorcycle in the world can claim this kind of achievement. Following the premature ending of Vincent production, Fritz Egli's 1967 Egli-Vincent was the first chassis completely redesigned for a Vincent in 21 years. Egli's machine inspired numerous builders for several generations and this book traces, holistically, the story of all those motorcycles in the broad context of the classic and modern history of the Vincent. Understand how the flame of passion still burns brightly today.

Northeast American Sports Car Races

Terry O'Neil
2022-02-07 The growth of sports car racing in Northeast America was not painless. Tragedy, mystery, subterfuge, intrigue, and an adherence to a particular club philosophy all featured in its story during the 1950s, when professionalism in the sport was always bubbling under the surface. The northeast area of America has long been considered the cradle of post World War II sports car racing; the Sports Car Club of America was founded there, and it was the entry point to America for a host of European sports cars. Early in the 1950s, road races had been permitted by some State authorities, but due to fatal accidents a ban on such racing came into effect. Forced to find alternative venues, the motor clubs were attracted to civil airports and a few military bases. But the drivers craved

more challenging venues on which to hone their skills. This resulted in a few individuals chancing their reputation - and a great deal of money - and opening purpose-built circuits. This book gives a unique insight into this intriguing journey through the decade. Extensively researched, the compelling story and stunning contemporary photos, many previously unpublished, paint a fascinating portrait of a nascent sport coming into its own.

Scooter Lifestyle

Ian Grainger 2014-09-16 There has been plenty said and written about scooters over the years, but until now there has been no definitive look at the culture surrounding our chosen way of life. Many authors have written about mods and the infamous and often over-hyped beach battles of the 1960s, but hardly any have tried to capture the atmosphere of the modern scene in print. We still owe the original mods for fuelling the imagination of past, present and future generations and for leaving a rich scooter heritage

behind them. Although the mod way of life was the spark which lit the fuse for many of us, the majority of scooter riders have evolved into lifestyle scooterists. We may not dress in a particular style, our scooters may not be adorned with lights and mirrors, but we still burn with the same passion as our scooter riding ancestors. It's over sixty years since the first Italian scooters rolled off the production lines, but there is still a buzzing and vibrant lifestyle surrounding them. The small capacity machines have overtaken the lives of thousands of us, often to the detriment of everything else we hold dear. Careers, relationships and families have suffered for this overwhelming and expensive addiction. An addiction to which there is no cure. We live and breathe the sickly sweet smell of synthetic two-stroke oil and worship at the altar of our chosen gods, Lambretta and Vespa (or occasionally Gilera and Italjet). Our hands are permanently ingrained with the oily 'tattoo's' of a thousand engine rebuilds

and our major organs have suffered the long term effects of our hedonistic lifestyle. Including interviews with well known scootering personalities, over 150 colour photographs of award-winning custom scooters, best-selling scooter models, and information on rallies and events, this book is a must-have for anyone interested in these fun machines.

Amédée Gordini Roy C. Smith
2022-03-10 This is a story of excitement, laughs, astonishment and anger - a story of the determination of a man with a dream and a passion for motor racing in the big leagues. It is the first time that the history of the always under-financed Gordini racing team has been documented in English, and the first complete story of Gordini himself in any language. This volume will appeal to new enthusiasts and old hands of Formula 1 and sports prototype racing, especially those who have owned a Gordini-badged high-performance Renault road car. It charts Gordini's early life and beginnings in motorsport, up to 1969 when Renault took over the Gordini company, keeping his name on all the racing engines until 1986, before finally resurrecting it for a performance version of the Renault Twingo and Clio in

2009. The book is packed with evocative period images from important collections, supplementary transcripts in English from many contemporary interviews, plus recollections from former employees remembering their time working with Gordini, and an exhaustive set of statistics. All the way it's a roller coaster of joy, despair, humour, and stunning images. The racing legend of 'Le Sorcier' lives on.

Lotus Europa: Colin Chapman's mid-engined masterpiece

Matthew Vale
2022-04-14 The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the

major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.
