## **Contemporary Task-Based Language Teaching in Asia**

Michael Thomas 2015-02-26

Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some

countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

**Advancedness in Second Language Spanish** Mandy R. Menke 2021-02-08 This book analyzes the construct of advanced proficiency in second language learning by bringing together empirical research

from numerous linguistic domains and methodological traditions. Focusing on the dynamic nature of language use, the volume explores diverse manifestations of high-level second language Spanish, including performance on standardized proficiency assessments, acquisition of late-acquired linguistic structures, sophisticated language use in context, and individual differences. Chapters relate empirical findings to current definitions of advancedness, challenging scholars and practitioners to re-consider existing conceptualizations, and propose possible directions for future research and teaching with second language speakers of Spanish. By addressing larger issues in the field of second language learning, the volume is a valuable reference for language teachers, scholars, professionals and students with an interest in second language acquisition generally, and second language Spanish, more specifically.

### **Teachers and Code-breakers**

Thomas O'Loughlin 1998 That Genesis was a key text in the formation of the medieval intellectual world is well recognised. But what were the motives and methods of those who used it? This book looks at the writers and how they wrote about Genesis to reconstruct the intellectual history of the period. It explores how their use of Genesis discloses common attitudes to revelation, authority, and one another. In turn the book examines, how awareness of their self-understanding, can help in understanding their exegesis. Since they built on authorities and one another, and wished 'to remain true' to their authorities, how did exegesis change and develop? This study reveals a group who saw themselves as a single body dispersed over time, charged with a common task as

'Christian Schoolmasters', and who wished to retain all the had received, make it suitable for teaching their students, and ensure its continuance. The book explores the intellectual bonds between those we usually study (e.g. Augustine) and umpteen others whose often anonymous exegeses we tend to ignore - yet it was the cumulative impact of both that created medieval theology. Sangre De Cristo Leonard Davies 2004-06-08 MONEY, GREED, BETRAYAL, CORRUPTION, AND FINALLY JUSTICE Alfred Curran is the sole heir to the Sangre de Cristo agricultural empire. When he returns to run it he realizes it is a corrupt feudal state. Before he can uncover the culprits he goes to Mexico where his car plunges over a cliff and he is left for dead. Peasants find his mutilated body and take him to clinic funded by drug money where the doctor in charge reconstructs his mutilated face. Curran has lost his memory and before he recovers it he and the doctor are arrested

and thrown into the living hell of Los Altos Prison. When Curran recovers his memory and escapes from Los Altos he discovers that he has been framed for murder and that his wife and land have been stolen. He assumes a new identity and returns to the Sangre for revenge. He finds redemption and the woman he loves.

The stories take place in the 26th century when humanity has expanded to a human space colonizing over 30 planets in a sphere of nearly 60 light-years in diameter. Alyie encounters different human cultures and physical and technical challenges as she makes her ascent up the Sidereal Federation hierarchy. She needs to summon up all her skill, intelligence, insight

and associations with colleagues to overcome the many crisis that face her and the Sidereal Federation.
