*Problem Solving, Abstraction, and Design Using C++* Frank L. Friedman 1999 This best-selling text now includes coverage of the AP string class and apvectors. As with the original, this book stresses problem-solving techniques, while introducing students to object-oriented concepts early. The system-defined string and stream classes and a user-defined money class are used to reinforce the importance of data modeling in programming. The vector version contains all of the classic learning features readers have come to know and trust in authors Frank Friedman and Elliot Koffman. These features include case studies, program style sections, syntax display boxes, end-of-section exercises, common-error sections, chapter reviews, quick-check exercises, and programming projects. High school teachers: If you are interested in using this text for your Advanced Placement Computer Science course, please send your name and address to c++ap@awl.com for more information. This book will come bundled with Addison-Wesley's Review for the Computer Science AP Exam in C++. High Schools ordering this book should use the following ISBN: 0-201-35761-5. 0201357569B04062001

**Preparing Students for College and Careers**

Katie Larsen McClarty 2017-08-22 Preparing Students for College and Careers addresses measurement and research issues related to college and career readiness. Educational reform efforts across the United States have increasingly taken aim at measuring and improving postsecondary readiness. These initiatives include developing new content standards, redesigning assessments and performance levels, legislating new developmental education policy for colleges and universities, and highlighting gaps between graduates' skills and employers' needs. In this comprehensive book, scholarship from leading experts on each of these topics is collected for assessment professionals and for education researchers interested in this new area of focus. Cross-disciplinary chapters cover the current state of research, best practices, leading interventions, and a variety of measurement concepts, including construct definitions, assessments, performance levels, score interpretations, and test uses.
