Glass House Ken Ham 2019-02-20 Evolution as an idea is considered a rock-solid truth among secular scientists, but when you begin looking at the evidence and asking simple questions, you find their

conclusions to be just fragile assumptions, unproven myth, and outright misconceptions - like a glass house built on shifting sands. Discover the pervasive influences of the atheistic religion of Darwinian evolution Learn what science is and how science is actually devastating to evolution Explore how evolution developed from unproven science to a popular and cultural worldview Now a powerful team of credentialed scientists, researchers, and Biblical apologists take on the pillars of evolution, and the truths they reveal decimate Darwin's beliefs using a Biblical and logical approach to evidence.

Managing Public Computing

Michael N. Cook 2007 "Computers have been a major resource in libraries for many years. From the first OPAC terminal to librarian-assisted DIALOG searching, the role of computers in service to library

patrons has come a long way. Today, library public computers serve many different needs of patrons. Public computers are OPACs; gateways to databases, e-books, e-journals, video and audio content; information resources about the library and its many services; e-mail kiosks; and a destination where patrons find numerous software applications. All of these resources are often loaded on each public computer, and patrons flock to them. These computers are fully networked and often configured for, or attached to, numerous peripherals. This public computing environment presents a wide range of challenges to academic and research library staff and administrators. In an environment that demands more of the resources, the infrastructure, and the staff who work to keep public computing the stable and reliable door to all things digital in the library, how are libraries managing and supporting public computing to

meet the needs and expectations of today's library user?" --Publisher's Website
