The Autonomous Revolution William H. Davidow 2020-02-18 The bestselling authors of *The Virtual Corporation* describe how the rise of AI and virtual environments are ushering in an epic cultural transformation. We are at the dawn of the Autonomous Revolution, a turning point in human history as decisive as the Agricultural and Industrial Revolutions. More and more, AI-based machines are replacing human beings, and online environments are gathering our data and using it to manipulate us. This loss of human autonomy amounts to nothing less than a societal phase change, a fundamental paradigm shift. The same institutions will remain—schools, banks, churches, and corporations—but they will radically change form, obey new rules, and use new tools. William H. Davidow and Michael S. Malone go deeply into the enormous implications of these developments. They show why increases in productivity no longer translate into increases in the GDP and how zero cost, one-to-many communications have been turned into tools for cybercrime and propaganda. Many of the book's recommendations—such as using taxes to control irresponsible internet behavior and enabling people to put their data into what are essentially virtual personal information "safety deposit boxes"—are bold and visionary, but we must figure out how we will deal with these emerging challenges now, before the Autonomous Revolution overcomes us. "Lots of books talk about what's happening. This book talks about the why behind the what. It will transform your view of the future." —Geoffrey Moore, bestselling author of *Crossing the Chasm* "A provocative work combining historical inquiry, present-day technology crises, and possible future solutions."— *Library Journal*

Public Education, Neoliberalism, and Teachers Paul Bocking 2020-04-20 From pressure to "teach to the test" and the use of quantitative metrics to define education "quality," to the rise of "school choice" and the shift of principals from colleagues to managers, teachers in New York, Mexico City, and Toronto have experienced strikingly similar challenges to their professional autonomy. By visiting schools and meeting teachers, government officials, and union leaders, Paul Bocking identifies commonalities that are shaping how teachers work and public schools function. While arguing that neoliberal education policy is a dominant trend transcending the realities of school districts, states, or national governments, Bocking also demonstrates the importance of local context to explain variations in education governance, especially when understanding the role of resistance led by teachers' unions.

America in the Age of Trump Douglas E. Schoen 2017-07-04 America in the Age of Trump is a bracing,

essential look at the failure of a great nation to meet the needs of its people and the challenges of the age—and the resulting collapse of public trust in government, as well as a pervasive crisis of national values, from broken families to a loss of faith in the American idea itself. This crisis of values occurs just as the country faces an unprecedented array of fiscal, economic, social, and national-security challenges—out of control federal spending, frighteningly large deficits, massive gaps of income and opportunity, cultural division, and a dangerous world in which American power seems increasingly incidental. In America in the Age of Trump, Douglas E. Schoen and Jessica Tarlov offer a definitive and unique assessment of a nation in turmoil, looking beneath well-known problems to identify underlying yet poorly understood causes. Readers will confront the crises, one by one: of trust, values, and governance; of education, economic opportunity, and fiscal solvency; of national security, domestic tranquility, and race relations. America in the Age of Trump gathers in one place a clear and comprehensive evaluation of the fundamental issues confronting the American future while offering bold, fresh approaches to meeting these challenges. Other books have described the specter of American decline, but none has been so comprehensive in its diagnosis or forward-looking—and non-ideological—in its remedies, explaining how we might yet overcome national self-doubt to reclaim our traditional optimism, reassert our place in the world, and secure a prosperous future for our citizens.
