"This live video introduces Cisco ASA solutions to overcoming obstacles by providing complete configuration and troubleshooting guidance. Cisco ASA 5500-X Series Next-Generation Firewalls LiveLessons (Workshop) is the definitive insider's guide to planning, installing, configuring, and maintaining the new Cisco ASA firewall features."--Resource description page.

**Cisco ASA for Accidental Administrators** Don R. Crawley 2015-03-04  
Cisco ASA for Accidental Administrators is a major update to the previous Accidental Administrator ASA book. This new edition is packed with 48 easy-to-follow hands-on exercises to help you build a working firewall configuration from scratch. Based on software version 9.x, it continues as the most straight-forward approach to learning how to configure the Cisco ASA Security Appliance, filled with practical tips and secrets learned from years of teaching and consulting on the ASA. There is no time wasted on boring theory. The essentials are covered in chapters on installing, backups and restores, remote administration, VPNs, DMZs, usernames, transparent mode, static NAT, port address translation, access lists, DHCP, password recovery, logon banners, AAA (authentication, authorization and accounting), filtering content and more. Inside this concise, step-by-step guide, you'll find: \*\*How to backup and restore software images and configurations \*\*How to configure different types of VPNs, including AAA authentication \*\*The secrets to successfully building and implementing access-lists All this information is presented in a straight-forward style that you can understand and use right away. The idea is for you to be able to sit down with your ASA and build a working configuration in a matter of minutes. Of course, some of the more advanced configs may take a little longer, but even so, you'll be able to "get it done" in a minimal amount of time!  
[Cisco ASA Security Appliance Hands-On Training for Accidental Administrators](#) Don R. Crawley 2016-06-23 This is the Cisco ASA Security Appliance student lab manual designed for use in an instructor-led classroom setting. It is the companion to the book Cisco ASA for Accidental Administrators. Includes 72 hands-on exercises including: password recovery, building a configuration from scratch, previewing commands, using ASDM to build a configuration, analyzing the base configuration, backing up and restoring configurations and software images, remote logging options, how to configure Telnet and SSH, setting up login banners, remote authentication using RADIUS, Kerberos, and LDAP, site-to-site VPNs, remote access VPNs, configuring a DMZ, port scanning with nmap, and transparent mode. Each exercise is explained in step-by-step detail in order to create several different firewall configurations, anticipating real world scenarios.
