**Microsoft Office Word 2003 Complete** Stephen Haag 2004 The I-Series leads the student through clear, error-free, and unambiguous steps to accomplish tasks that produce a finished document, work sheet or database table. The approach is not simply results-oriented; teaching how to accomplish a task is not enough for complete understanding and mastery. Prior to introducing steps, the authors discuss why each step is important and what roll all the steps play in the overall plan for creating a document, workbook or database. The I-Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged by doing.

MS Word 2002, Introductory Stephen Haag 2002 SERIES TAGLINE: THE "HOW and WHY", PRACTICAL APPROACH TO LEARNING APPLICATIONS.

Teaching Science for Understanding James Joseph Gallagher 2007 Offers middle and high school science teachers practical advice on how they can teach their students key concepts while building their understanding of the subject through various levels of learning activities.

MS Office XP 2002 The I-Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged- by doing. These texts have been written with clear, error-free, and unambiguous steps to accomplish tasks that lead to a finished document, worksheet or database table. The authors made the decision that teaching "how" to accomplish some task is not enough for complete understanding and mastery. Prior to introducing steps, the authors discuss why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document, workbook or database.

**Microsoft Office PowerPoint 2003 Introductory** Stephen Haag 2004 Emphasizes that students learn and master applications skills by being actively engaged- by doing. Prior to introducing steps, this title discusses why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document, workbook or database.

**Resources for Teaching Middle School Science** Smithsonian Institution 1998-04-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific areaâ€"Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by typeâ€"core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexedâ€"and the only guide of its kindâ€"Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

**Understanding Psychology** Charles G. Morris 1993 This book presents a scientific, accurate, and thorough overview of the essential concepts of psychology in engaging language that the average reader can easily comprehend. Topics include the science of psychology, the biological basis of behavior, sensation and perception, states of consciousness, learning, memory, cognition and mental abilities, motivation and emotion, life-span development, personality, stress and health psychology, psychological disorders, therapies, and social psychology. For counselors, behavioral analysts and others in various related psychology fields.

Microsoft Office 2003 Stephen Haag 2004 Emphasizes that students learn and master applications skills by being actively engaged - by doing. Prior to introducing steps, this I-Series Applications textbook discusses why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document, workbook or database.
