*TECHNOLOGY IN MENTAL HEALTH* Stephen Goss 2016-07-01 In the half-decade since publication of the first edition, there have been significant changes in society brought about by the exploding rise of technology in everyday lives that also have an impact on our mental health. The most important of these has been the shift in the way human interaction itself is conducted, especially with electronic text-based exchanges. This expanded second edition is an extensive body of work. It contains 39 chapters on different aspects of technological innovation in mental health care from 54 expert contributors from all over the globe, appropriate for a subject that holds such promise for a worldwide clientele and that applies to professionals in every country. The book is now presented in two clear sections, the first addressing the technologies as they apply to being used within counseling and psychotherapy itself, and the second section applying to training and supervision. Each chapter offers an introduction to the technology and discussion of its application to the therapeutic intervention being discussed, in each case brought to life through vivid case material that shows its use in practice. Chapters also contain an examination of the ethical implications and cautions of the possibilities these technologies offer, now and in the future. While the question once was, should technology be used in the delivery of mental health services, the question now is how to best use technology, with whom, and when. Whether one has been a therapist for a long time, is a student, or is simply new to the field, this text will serve as an important and integral tool for better understanding the psychological struggles of one's clients and the impact that technology will have on one's practice. Psychotherapists, psychiatrists, counselors, social workers, nurses, and, in fact, every professional in the field of mental health care can make use of the exciting opportunities technology presents.

*The Basics of HIPAA Compliance* Apex Legal Publishing 2023-09-27

Intended as a training tool for employees, this short but comprehensive manual introduces and explains all the core concepts involved in managing and handling health care information in compliance with HIPAA regulations. Also includes a glossary of HIPAA terms and phrases. Training, in some form, is required under HIPAA regulations, but the rules are vague as to what form that training should take. Training should be provided "as necessary and appropriate for members of the workforce to carry out their functions" (HIPAA Privacy Rule) and covered entities and business associates should "implement a security awareness and training program for all members of the workforce" (HIPAA Security Rule). There is no requirement that calls for video sessions, exams or certificates. Jump-start your HIPAA training program and quickly get to the all-important "good faith effort" benchmark by distributing this manual to employees who handle patient records, scheduling a question-and-answer meeting after they've read the manual, and having them sign and submit the training acknowledgement form included at the back of the book. Retain the acknowledgement forms and a record of the meeting to document your training, as required by HIPAA. If you do not have a comprehensive HIPAA compliance program in place, getting your people through a basic training program and documenting that fact should not be delayed while you develop your policies, procedures and advanced training programs. This manual should not be substituted for a comprehensive ongoing training program where advanced training is provided for company-specific procedures or specific job responsibilities. Please be advised, however, that NO training program, no matter how expensive or extensive, can guarantee that any individual auditor or investigator will approve your efforts. The regulatory authorities do not license, accredit or certify any trainers or training.

This book presents the proceedings of the 13th annual conference on Health Informatics Meets Digital Health (dHealth 2019), held in Vienna, Austria, on 28 - 29 May 2019. In keeping with its interdisciplinary mission, the conference series provides a platform for researchers, practitioners, decision makers and vendors to discuss innovative health informatics and eHealth solutions to improve the quality and efficiency of healthcare using digital technologies.
