Computer Education for Teachers Vicki F. Sharp 1996 This text aims to assist future teachers in either becoming computer literate or using computers more effectively in a classroom situation. Practical examples are provided, including samples of various types of hardware and programs for use in instructional planning and classroom instruction. This edition includes a new chapter on telecommunications, including such topics as videoconferencing and distant education, Internet and on-line services. The chapter on Multimedia has been revised and incorporates classroom projects and coverage of virtual reality, morphing and warping in order to introduce students to ways of using the computer to combine text, graphics and sound into a multimedia presentation capable of improving instruction. There are also updated discussions of software and an updated list of annotated software including CD-ROM and laserdisc.

Andi the alien and the fourth grade science project Kevin Horvath 2012-07-06 This book is both fiction and non-fiction. It gives a completely imaginative alternative to how the human species actually began. The scientific perspective on human beginnings is that we evolved from apes while the religious perspective is that we evolved from Adam and Eve. This book takes another approach by suggesting, a ten year old alien named Andi went to every human-inhabited world in the Universe and asked for two volunteers-one male and one-female for a science project. He brought them to one planet that can sustain all forms of life, which Andi names Earth. The book covers our solar system, the continents, sub-continents, and countries, making it suitable for teaching in a regular classroom setting. Also, it encompasses the basic philosophy of the Dagonian alien life of putting peace and love before everything.

The Solar System (Fourth Grade Science Experiments) Thomas Bell 2013-12-10 If your child is struggling with science, then this book is for you; the short book covers the topic and also contains 5 science experiments to work with, and ten quiz questions. The book covers the following: The Sun Mercury Venus Earth Mars Jupiter Saturn Uranus Neptune Pluto More Than Just Planets Experimenting With The Solar System This subject comes from the book "Fourth Grade Science (For Home School or Extra Practice)"; it more thoroughly covers more fifth grade topics to help your child get a better understanding of fifth grade math. If you purchased that book, or plan to purchase that book, do not purchase this, as the problems are the same.
