The Essential Guide to Flash CS4 AIR Development Marco Casario 2009-01-23 We all know what a great tool Flash is for creating dynamic,

engaging web content, and Adobe's CS4 release just makes it even better. Among the newer features is the ability to take all the power of Flash for the Web and put in on the desktop using AIR. AIR capability is built right into the Flash CS4 integrated development environment, which means you can start writing desktop applications right away. This book not only covers the essentials of using Flash with AIR (and AIR with Flash), but also shows you how to extend application functionality in new ways. Once you've got Flash on the desktop, you're no longer constrained by the limitations of running inside a web browser. You'll have access to the local desktop file system, and AIR adds SQLite functionality for native database support. And just as Flash animations have a consistent look and feel across browsers, AIR allows you to create applications that work consistently across operating systems--Mac OS X, Windows, and Linux. For any Flash developer who wants to go from the Web to the desktop (and who doesn't?), this book is required reading. It not only tells you how to do it, but is full of practical, easy-to-follow examples that will have you building desktop AIR applications with Flash in no time. Expanding your existing Flash skills with *The Essential Guide to Flash CS4 AIR Development* will make you an even more potent and indispensable force on any development team!

Scripting InDesign CS3/4 with JavaScript Peter Kahrel 2009-04-05 Author note: In Adobe InDesign CS6, the changes to InDesign's scripting DOM are absolutely minimal. Therefore, the information in this title is valid and up to date for CS6. Updated: August 2010. Author Peter Kahrel updated this Short Cut to cover InDesign CS5. InDesign provides a powerful set of tools for producing beautiful documents. While you can certainly do all your work by hand through InDesign's graphical interface, there are many times when it's much easier to write a script. Once you've automated a task, you can run it over the whole document, ensuring consistency, or just when you need it, simplifying and speeding your layout process. All it takes is a bit of JavaScript knowledge and a willingness to explore InDesign's programming features.
