*Motor* 1952

**National Union Catalog** 1970 Includes entries for maps and atlases.

**Rootes Cars of the 1950s, 1960s & 1970s: Hillman, Humber, Singer, Sunbeam & Talbot** David Rowe 2021-10-05 The Rootes Group, although only achieving a 10-12 per cent market share, were the sixth largest British car manufacturer: more importantly, during the 1950s, more than half the cars they produced were exported. With every model produced from 1950 onwards featured in full colour and with detailed information - including colour schemes, optional equipment, technical specifications, plus other manufacturers' cars built using Rootes components - this is the ultimate book for all Hillman, Humber, Singer and Sunbeam enthusiasts. Cars produced by Chrysler/Talbot and Peugeot after their acquisition of the Rootes Group are also included. This book includes hundreds of original photographs, taken by the author at many car shows over a number of years, and provides a unique pictorial history of Rootes-manufactured cars.

*Cars & Parts* 1981

**Return to Glory!** Robert Ackerson 2022-04-12 1952 was one of the most important years in Mercedes-Benz racing history; after a 13-year absence, the marque returned to motor sport competition with an automobile that rewrote the history of modern sports car racing. The 300 SL's debut was the culmination of a long, difficult road back to racing for Mercedes-Benz. This book vividly depicts the 300 SL's performance in the five races in which it competed in 1952, and tells the story of how it became the most successful competition sports car of that year. Through dramatic photographs, and equally stirring text, one of the greatest years of sports car racing is brought to life, filled with automobiles often finished in national racing colours, prepared by great factory teams, driven by men who were national sporting idols, and raced under gruelling conditions unique to the age. From its Mille Miglia debut, through the Nurburgring, the Le Mans 24 Hours, to its

greatest race, the Carrera Panamericana, the 300 SL's career from conception to retirement is presented, culminating with a detailed photographic essay illustrating restoration of the oldest 300 SL in existence.

*Popular Science* 1980-12 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

**Vincent Motorcycles** Philippe Guyony 2021-10-28 Very few motorcycles have carved a mark in history like the Vincent V-twin, from its arrival in 1946 and up to the present day. On the road, in club racing, in drag races, or competing for land speed records, it dominated the motorcycle world, leading to the famous catchphrase coined by the factory: "The World's Fastest Standard Motorcycle." It was a FACT - NOT a slogan. Images such as that of Rollie Free, in swimming trunks, laying flat on his works-modified Black Shadow and taking the American motorcycle land speed record at Bonneville in 1948, have now passed into posterity. In fact, the big Vincent was so ahead of its time, that it continued to compete successfully - almost arrogantly - in racing until the mid-1970s, against modern bikes. No other motorcycle in the world can claim this kind of achievement. Following the premature ending of Vincent production, Fritz Egli's 1967 Egli-Vincent was the first chassis completely redesigned for a Vincent in 21 years. Egli's machine inspired numerous builders for several generations and this book traces, holistically, the story of all those motorcycles in the broad context of the classic and modern history of the Vincent. Understand how the flame of passion

still burns brightly today.

**Amédée Gordini** Roy C. Smith 2022-03-10 This is a story of excitement, laughs, astonishment and anger - a story of the determination of a man with a dream and a passion for motor racing in the big leagues. It is the first time that the history of the always under-financed Gordini racing team has been documented in English, and the first complete story of Gordini himself in any language. This volume will appeal to new enthusiasts and old hands of Formula 1 and sports prototype racing, especially those who have owned a Gordini-badged high-performance Renault road car. It charts Gordini's early life and beginnings in motorsport, up to 1969 when Renault took over the Gordini company, keeping his name on all the racing engines until 1986, before finally resurrecting it for a performance version of the Renault Twingo and Clio in 2009. The book is packed with evocative period images from important collections, supplementary transcripts in English from many contemporary interviews, plus recollections from former employees remembering their time working with Gordini, and an exhaustive set of statistics. All the way it's a roller coaster of joy, despair, humour, and stunning images. The racing legend of 'Le Sorcier' lives on.
