Listening Is Learning Frank

Thoms 2018-12-21 Listening is

Learning: Conversations

Between 20th and 21st Century

Teachers is a unique approach

for meeting the challenges of

today's teachers. In sixteen

chapters of conversations

between veterans and young

teachers, readers will discover

engaged teaching from the

previous century that captures

the attention of students. The

classroom is the perhaps the

last vestige of hope where

children will discover the joy of

being together without

intermediary devices.

Conversations invite reflection.

Listening to respectful

discussions between young and

older teachers allows readers

to slow down and take stock of

their own positions and beliefs.

Young teachers will come away

with not only rich ideas but

also a sense of encouragement

to meet the challenges of

digitally driven students. Face-

to-face classrooms are the best

hope for students to discover

their best selves, without

distractions so prevalent in

social media. If teachers

choose to show students from

the first day that they care

about them and are willing to

listen to their lives, they will

build trusted

relationships--essential for

students--and for teachers.

Differentiated Reading

Instruction Jules Csillag

2016-05-05 Learn how tech

tools can make it easier to

differentiate reading

instruction, so you can reach

all of your students and help

them increase their fluency and

comprehension. This practical

guide brings together

evidence-based principles for

differentiated reading

instruction and user-friendly

tech tools, to help middle level

students grow as readers in

fun, interactive, and engaging ways. You'll find out how to: Use text-to-speech tools to facilitate decoding and fluency development; Develop tech-based vocabulary lessons for direct and contextual instruction; Get your students engaged in research and nonfiction texts with videos, custom search engines, and interactive annotation tools; Differentiate your fiction reading instruction with visualization, prediction, and summarization exercises; Encourage students to enhance their reading through using dictation software and diverse Google tools; Create your own formative and summative assessments for students at all levels of reading ability. Throughout the book, ideas are provided for both basic technology use and for more advanced applications--so no matter your comfort level with technology, you'll find strategies that you can implement in your classroom immediately.

The content unfolds in a consistent format of numbered steps and bullet points, enhanced by real student samples, examples, and illustrations. Printed in large format, full color, and with spiral binding, this book is not only informative, but also eye-catching and easy to use. The writing is aimed primarily toward parents and other adults who are helping children of various ages and abilities with their schoolwork, but older students can also use this book independently. *Success in School* is a teaching tool, how-to guide, and reference manual that will support students throughout their school
