Decision Making: Recent Developments and Worldwide Applications

Stelios H. Zanakis
2013-04-17 This chapter describes a study conducted at the Swinburne University of Technology in Australia, in their School of Business. The study was to explore the applicability of a judgment-analytic decision support system to the assessment of the likelihood of an applicant being selected for admission to the School's Graduate Certificate in Business Administration (GCBA) program. The likelihood of a program administrator selecting a particular applicant is directly linked to the assessment of the likelihood of that applicant's success in the GCBA program. The purpose of this study, in effect, was to analyze the

administrative judgment process in assessment of an applicant's likelihood of success in the program. THE PROCESS OF HUMAN JUDGMENT Human judgment is a process through which an individual uses social information to make decisions. The social information is obtained from an individual's environment and is interpreted through the individual's cognitive image of the environment. The cognitive image provides a representation of the environment based on past experiences and training, and essentially predisposes the person to respond to social information in predictable ways. An individual's policies or beliefs about the environment represent these patterns. Human judgments are based then upon one's interpretation of available information. They are probability statements about one's environment and how one reacts to it. This condition leads to the human judgment process being inherently limited. It is fundamentally a covert process. It is seldom possible for an

individual to accurately describe his or her judgment process accurately.

English and American Literature Charles Herbert Sylvester 1905

The Complete Guide to Shakespeare's Best Play Aileen M. Carroll 2000 Ideal as a year-long program or for selective units. This packed volume takes an intense look at Romeo and Juliet, Julius Caesar, Macbeth, Hamlet, A Midsummer Night's Dream, and The Tempest. Each of the 40 lessons opens up the world of Shakespeare, his words, and his characters. Extensive teacher support includes assessments, historical background and language study, synopses, and suggestions for engaging hard-to-reach learners.

English in Action Jacob Cloyd Tressler 1960
Modern Methods in High School Teaching Harl Roy Douglass 1926 This volume addresses teachers and principals, presenting a comprehensive treatment of the methods of teaching in high schools. The author assumes a

familiarity on the part of his readers with the nature of the learning process, adolescence, and the psychological foundations of interests and motives as they relate to whole-hearted pupil activity. The fundamentals of both theory and practice are set forth, and an attempt has been made to outline and describe the newer types of procedure, which are being employed in different subjects in the best secondary schools. Throughout the volume the attempt has been made clearly to represent practices rather than to advocate their adoption. The reader is permitted to draw his own conclusions. The book will appeal to the type of reader who wants to be intelligent about what is going on in high-school teaching.
