

Assessment Guide Test Grade Gomath

Curriculum-based Evaluation Kenneth W. Howell 1993 A focus on what teachers can do, not on what special learners can't... This easy-to-understand book examines teacher-made tests and curricula as they relate to a child's success or failure. To break through the inertia of common practice in the classroom, the authors integrate the basic concepts of evaluation and instructions with the best current knowledge to generate productive classroom tools. Using a step-by-step approach, the authors show you: how to use the curriculum to meet the child's needs, how to assess in an ongoing way, and how to recognize when instructional change is warranted.

Assessment in Special Education Roger Pierangelo 2006 This text presents a uniquely practical approach to the topic of Assessment in Special Education. The authors organize the material into a "real-world story," by having each part and chapter of the book reflect the linear chronology of the assessment process used in schools. Unlike other books, this book is organized chronologically to present the overall process in a "straight line" - a practical and useful pedagogy in itself for the novice teacher. The text provides the practical tools necessary for a new teacher to understand the process of assessment in schools and then learn how to put it all together. It provides future special educators comprehensive coverage of the latest tests and evaluation procedures for all areas of exceptionality - for every age group - for students with mild, moderate and severe disabilities.
