## **A Textbook of Children's and Young People's Nursing**

**- E-Book** Edward Alan Glasper

2021-03-19 This innovative textbook provides a concise and accessible guide for undergraduate students specializing in children and young people's nursing in the UK and further afield. Each chapter has been fully updated to reflect current knowledge and practice. The wide range of topics covered includes all the essentials, such as contemporary child health policy and legal issues; knowledge and skills for practice; and caring for children with special needs. Students will learn how to recognize the deteriorating child, use procedural play and distraction, and consider the mental health of children and young people. A Textbook of Children's and Young People's Nursing is written by

multidisciplinary experts, rooted in child-centred healthcare within a family context, and draws upon best contemporary practice. It is an invaluable resource that will help nursing students provide effective, evidence-based care.

- Key points, summary boxes and clearly defined aims, objectives and learning outcomes to support learning - Conversation boxes to enliven the text - Patient scenarios to relate theory to practice - New chapters on skin health and the use of therapeutic play - Suggestions for seminar discussion topics to help teachers - Resource lists and online resources for further study or research - Online slides to complement chapters within book

## **New Frontiers in High Performance Computing and Big Data**

Geoffrey Fox  
2017-11-15 For the last four decades, parallel computing

platforms have increasingly formed the basis for the development of high performance systems primarily aimed at the solution of intensive computing problems, and the application of parallel computing systems has also become a major factor in furthering scientific research. But such systems also offer the possibility of solving the problems encountered in the processing of large-scale scientific data sets, as well as in the analysis of Big Data in the fields of medicine, social media, marketing, economics etc. This book presents papers from the International Research Workshop on Advanced High Performance Computing Systems, held in Cetraro, Italy, in July 2016. The workshop covered a wide range of topics and new developments related to the solution of intensive and large-scale computing problems, and the contributions included in this volume cover aspects of the evolution of parallel platforms and highlight some of the problems encountered

with the development of ever more powerful computing systems. The importance of future large-scale data science applications is also discussed. The book will be of particular interest to all those involved in the development or application of parallel computing systems. Security with Intelligent Computing and Big-Data Services 2019 Lakhmi C. Jain 2020-04-27 This book aims to attract researchers and practitioners who are working in Information Technology and Computer Science. This edited book is about basics and high level concepts regarding Blockchain Technology and Application, Multimedia Security, Information Processing, Security of Network, Cloud and IoT, Cryptography and Cryptosystem, Learning and Intelligent Computing, Information Hiding. It is becoming increasingly important to develop adaptive, intelligent computing-centric, energy-aware, secure and privacy-aware mechanisms in high performance computing

and IoT applications. The book serves as a useful guide for industry persons and also helps beginners to learn things from basic to advance in the area of better computing paradigm. Our aim is intended to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results in security related areas. We believe that this volume not only presents novel and interesting ideas but also will stimulate interesting discussions from the participants and inspire new ideas.
