The Oxford Companion to World Exploration David Buisseret (ed) 2007 Covering all aspects of global exploration, from Antarctica to the North Pole, The Oxford Companion to World Exploration examines the lives and expeditions of heroic and influential explorers. This coverage includes biographies, including Lewis and Clark, Ferdinand Magellan, Cheng Ho, Hernán Cortés, Ibn Battuta, Vitus Bering, and Christopher Columbus; national expeditions, including Portuguese, British, French, Chinese, Dutch, and Spanish; and navigational and marine sciences, such as navigational techniques, ancient and medieval navigation, ocean currents and winds, longitude, cartography, and aerial surveys. The Companion's temporal scope ranges from the ancient cultures of Egypt, Persia, Greece, Byzantium, China, Polynesia, and Rome, through to modern space exploration. The articles have been written by leading scholars from across the globe, utilizing the most current scholarship in the field of exploration studies. The Companion contains 800 entries, supplemented by 150 black-and-white and 50 full-color photographs and maps. Annotated primary source materials, such as travel logs and personal letters, supplement select biographies. Each entry is signed by a leading scholar in the field, contains a bibliography for further reading, and is cross-referenced to other useful points of interest within the Companion. Published in association with the Newberry Library in Chicago, the Companion will reproduce more than 100 images from its world-renowned collection.

From Sea Charts to Satellite Images David Buisseret 1990-06-22 "The authors write authoritatively and crisply . . . How to use maps in teaching is spelled out carefully, but the authors also manage to sketch in the background of American mapping so the book is both a manual and a history. Commentaries are sprinkled with stimulating new ideas, for instance on how to use bird's-eye views and country atlases in the classroom, and there are didactic discussions on maps showing the walking city and the impact of the street car. "An extraordinarily wide range of maps is depicted, which makes for good browsing, pondering and

close study. . . . This is a very good, highly attractive, and worthwhile book; it will have great impact on the use of old (and new!) maps in teaching. As well, this is a tantalizing survey of mapping the United States and will whet the appetites of students and encourage them to learn more about maps and their origins."—John Warketin, *Cartographica*
