Earth-Sheltered Houses Rob Roy 2006-04-03
The only how-to manual on the subject directed to mainstream owner-builders An earth-sheltered, earth-roofed home has the least impact upon the land of all housing styles, leaving almost zero footprint on the planet. Earth-Sheltered Houses is a practical guide for those who want to build their own underground home at moderate cost. It describes the benefits of sheltering a home with earth, including the added comfort and energy efficiency from the moderating influence of the earth on the home's temperature-keeping it warm in the winter and cool in the summer-low maintenance, and the protection against fire, sound, earthquake and storm afforded by the earth. Extra benefits from adding an earth or other living roof option include greater longevity of the roof substrate, fine aesthetics, and environmental harmony. The book covers all of the various construction techniques involved including details on planning, excavation, footings, floor, walls, framing, roofing, waterproofing, insulation and drainage. Specific methods appropriate for the inexperienced owner-builder are a particular focus and include: pouring one's own footings and/or floor the use of dry-stacked (surface-bonded) concrete block walls post-and-beam framing plank-and-beam roofing, and drainage methods and self-adhesive waterproofing membranes. The time-tested, easy-to-learn construction techniques described in Earth-Sheltered Houses will enable readers to embark upon their own building projects with confidence, backed up by a comprehensive resources section that lists all the latest products such as waterproofing membranes, types of rigid insulation and drainage products that will protect the building against water damage and heat loss.

Green Circles Chuck Hall 2007-05 "Green Circles: A Sustainable Journey from the Cradle to the Grave" observes environmentally friendly living throughout the human life cycle. Starting with natural childbirth and finishing with green

burial, the text examines all phases of life in between. (Environmental Studies).

Stonehouse One The Building of Brambly Cottage Chas Rose 2018-12-21 A man escapes the hustle and bustle of the city to build his home among the mountains and forests of south east Australia. Defines his struggle to secure a safe environment for his young family. The owner builder has many choices in materials but this author fell back on his heritage to build a solid home of slate and stone!

Living Off the Grid David Black 2008-11-17 In daily life, we can take control of the resources and services we depend on. Electricity and energy don't have to come off the public utility grid—alternatives abound in solar, wind, and water generated power. Design decisions can drastically affect power consumption, and bio-diesel and alternative fuels can help break the oil habit. Dave Black describes alternatives for eco-pimping your home and lifestyle for independence, economy, and a more integrated way of life. Equally valuable for the urban dweller vaguely concerned about the size of his or her carbon footprint and the rural self-sufficiency enthusiast, *Living Off the Grid* can help anyone take control of his or her life and way of living.

Home Energy Digest, Wood Burning Quarterly 1979

Stone House 2009 Have you ever dreamed of building or at least living in a beautiful stone house? For more than five years Stonefield Publishing's *Stone House: A Guide to Self-Building with Slipforms* has been the prime source for information on a unique method of stone masonry that affords everyone, regardless of their level of building experience, the opportunity to create walls and even homes of stone. "The technique has been around for a long time," says author Tomm Stanley, "but it's not that well known. Add to that the mystique that surrounds the traditional craft of stonemasonry and there's no wonder that stone houses are not all that common, even in areas where stone is abundant". The book has now been revised and is being re-released with two

new chapters, digital enhancement to the original images and new photographs. Stonefield Publishing's Marketing Manager Brad Andersen notes, "We've received a lot of great feedback from readers over the years but one consistent issue was the image quality. We took those comments to heart and with technology that wasn't available to us back in 2003 have just brought the photos to life". Tomm says that writing the new chapters and preparing the revised edition for print allowed him to finally complete his original vision of the book. "One of the new chapters, called Reflections, could only have been written after the passage of time. It's about looking back and thinking about what could have been done differently, what worked very well and also speculating on potential targets for future alteration. It really finished the story for me and makes it more complete for readers." Stone House focuses on the story of Tomm Stanley's own experience of building his house with the slipform method. This book is certainly not your average "how-to" offering; it is more like a tapestry of information and entertainment interwoven with technical advice, diagrams and pictures, tales of the owner builder experience and as the title implies, plenty of guidance on how to build your own stone house using the slipform method of construction. It makes great reading for those that are on the way to becoming self-builders as well as the rest of us that dream of such adventures.

The Art of Natural Building-Second Edition-Completely Revised, Expanded and Updated

Joseph F. Kennedy 2014-07-01 The original, complete, user-friendly introduction to natural building, now fully revised and updated The popularity of natural building has grown by leaps and bounds, spurred by a grassroots desire for housing that is healthy, affordable, and environmentally responsible. While there are many books available on specific methods such

as straw-bale construction, cob, or timber framing, there are few resources which introduce the reader to the entire scope of this burgeoning field. Fully revised and updated, *The Art of Natural Building* is the complete and user-friendly introduction to natural building for everyone from the do-it-yourselfer to architects and designers. This collection of articles from over fifty leaders in the field is now stunningly illustrated with over two-hundred full-color photographs of natural buildings from around the world. Learn about: The case for building with natural materials, from the perspectives of sustainability, lifestyle, and health What you need to know to plan and design your own beautiful and efficient natural home

Explanations of thirty versatile materials and techniques, with resources on where to go for further information on each How these techniques are being used to address housing crises around the world. Clearly written, logically organized, and beautifully illustrated, *The Art of Natural Building* is the encyclopedia of natural building. Joseph F. Kennedy is a designer, builder, writer, artist, educator, and co-founder of Builders Without Borders. Michael G. Smith is a respected workshop instructor, consultant, and co-author of the best-selling book *The Hand-Sculpted House*. Designing & Building Your Own House Your Own Way 1978

Living Homes Thomas J. Elpel 2010 The house of your Dreams does not have to be expensive. The key is all in the planning. How much a house costs, how it looks, how comfortable it is, how energy-efficient it is--all these things occur on paper before you pick up even one tool. A little extra time in the planning process can save you tens of thousands of dollars in construction and maintenance. That is time well spent! *Living Homes* takes you through the planning process to design an energy and resource efficient home that won't break the bank. Then, from the footings on up to the roof, author Thomas J. Elpel guides you through the nuts and bolts of construction for slipform stone masonry, tilt-up stone walls, log home construction, building with

strawbales, making your own terra tile floors, windows and doors, solar water systems, masonry heaters, framing, plumbing, greywater, septic systems, swamp filters, concrete-fly ash countertops, painting and more. Living Homes was completely re-organized and revised for the new sixth edition, based on five additional years of building experience with low-cost, high efficiency construction methods. Get the latest ideas on how to build a high-performance house that will stand the test of time! The sixth edition includes fifteen pages of new material covering the latest stone masonry tips, plus revised and expanded tips and techniques throughout the book.
