**Threatened Amphibians of the World** S. N. Stuart 2008 "Amphibians are facing an extinction crisis, but getting to the facts has been difficult. "Threatened Amphibians of the World" is a visual journey through the first-ever comprehensive assessment of the conservation status of the world's 6,000 known species of frogs, toads, salamanders, and caecilians. All 1,900 species known to be threatened with extinction are covered, including a description of threats to each species and an evaluation of conservation measures in place or needed. Each entry includes a photograph or illustration of the species where available, a distribution map, and detailed information on range, population and habitat and ecology. Introductory chapters present a detailed analysis of the results, complemented by a series of short essays written by many of the world's leading herpetologists. Appendices include annotated lists of lower risk species and a country-by-country listing of threatened amphibians."--pub. desc.

**Follow the Water** Ellen Cochrane 2026-03-17 A captivating and incredible true story about a girl who fell out of a plane over the Amazon—and walked out of the jungle eleven days later, perfect for fans of Hatchet and graduates of the I Survived series. On Christmas Eve 1971, seventeen-year-old Juliane Koepcke and her mother boarded a plane in Lima, Peru, bound for their home at the Panguana Research station deep in the Amazon. Twenty minutes from landing, the plane was struck by lightning, and Juliane hurtled two miles down through the rainforest canopy, crashing on the jungle floor. She woke up the next day with a broken collarbone, missing her glasses and one shoe, but incredibly, miraculously, alive. Pulling on every bit of knowledge her rainforest-studying parents imparted to her, she journeyed through the danger-filled jungle for eleven days. She was the sole survivor. Complete with sidebars that explore and explain the science that allowed Juliane to survive her fall, the diversity of life in the Amazon jungle, the natural history of Peru and much more, *Follow the Water* is a powerful and unforgettable true story of survival against all odds.

**SNAKES IN QUESTION 1E PB** Carl H. Ernst 1996-11-17 How do snakes crawl and climb? What do they eat? How do they breathe, hear, and smell? What is the largest snake? Authoritative and accessible, this book answers the most frequently asked questions about snakes and provides a basic introduction for both adults and children to the habits and marvels of these limbless creatures. Nearly 160 illustrations, 55 in color.

*Caribbean Islands Handbook* Sarah Cameron 1996 "The most complete, up-to-date information on the islands: how to get there, when to go, what to see, and where to stay and dine" --Travel & Leisure. 130 maps.

*Birds of Trinidad and Tobago* Martyn Kenefick 2016-10-20 Trinidad & Tobago are popular tourist destinations and the islands are also a top location for visiting birders. This comprehensive and portable field guide covers every species found on the islands. The concise text includes descriptions of every species, highlighting plumage variation and distinctions from similar species. The plates use the relevant images from *Birds of Northern South America* to create new plates specific for Trinidad & Tobago. This new edition has been completely revised. The plates have been extensively re-worked, with many images replaced and repainted. As a result, there are now eight extra plates, and some groups, such as flycatchers, have been repainted almost in entirety. The text has also been updated. This new edition supersedes all previous field guides to these popular islands.

**Flora of the Mediterranean** Christopher Gardner 2020-03-06 A unique window on the floral wonders of the Mediterranean world The Mediterranean - a land of blue skies, warm sunshine, rugged mountains and azure seas. Yet this familiar image conceals another Mediterranean - a secret landscape populated by a dazzling variety of wild flowers and plants, from spectacular orchids and ancient olive trees to delicate snowdrops and hardy cacti. Following on from their widely acclaimed *Flora of the Silk Road*, Chris and Basak Gardner present a stunning selection of 600 of the finest wild flowers that grow in the Mediterranean regions of the world. Travelling across five continents - Europe, North America, Africa, South America and Australia - the authors reveal the rich botanical profusion that makes up the flora of the Mediterranean regions of the world. For each region, a succession of the most outstanding flowers is featured, from the spectacular and exotic to the beautiful yet familiar, with each plant presented in its natural habitat. Beginning with the countries of the Mediterranean Basin, the reader is taken along the rugged Atlas Mountains, through Andalucía and Italy, to arrive at the amazing botanical richness of Greece, southern Anatolia and Jordan. In California and Chile the journey is through flowering deserts, snow-capped peaks and towering forests of redwood and monkey puzzle trees, beside a coast lapped by the Pacific Ocean. The ancient landscapes of Southern Australia provide a truly remarkable assemblage of astonishing flora, whilst the Western Cape of South Africa is home to an unimaginable diversity of flora. The accompanying text provides descriptions of the species, plant families and their distribution, as well as offering guidance to those wishing to photograph plants in the wild. With 600 stunning colour photographs, and presenting a breadth of flora never before brought together in a single volume, the authors offer a unique window on the floral wonders of the Mediterranean world.

*Snakes in Question, Second Edition* George R. Zug 2015-03-10 This new edition of *Snakes in Question* has been completely updated to take into account the most recent research available, offering useful scientific information about snakes while dispelling many widely-circulated myths and common fears. Accompanied by 100 stunning color photographs and written in the popular question-and-answer format of Smithsonian's "In Question" series, the book tells how snakes breathe, hear, smell, and much more. It covers not only the life cycle of snakes but also explores such phenomena as the rattlesnake's rattle, the viper's hiss, and the snake charmer's secrets. It addresses common folktales about snakes (do snakes milk cows?) and describes giant snakes, both real and imaginary. The authors also give expert advice on such subjects as distinguishing venomous species from harmless look-alikes and keeping snakes as pets.
