**Dictionary Of British And Irish Botanists And Horticulturalists Including plant collectors, flower painters and garden designers** Ray Desmond 2020-12-23

Over the past four centuries botanists and gardeners in the British Isles have gathered, maintained and propagated many varying species of plants. Their work has been documented in innumerable books and articles which are often difficult to trace. The Dictionary of British and Irish Botanists and Horticulturalists represents a time-saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed. The dictionary's utility comes not only from indicating the major publications of the named authors, but also the location of their herbaria and manuscripts.; The previous 1977 edition of the Dictionary has for many years been a much used source of information for botanists, botanic artists and archivists. In this revised edition the scope has been expanded to include among its 13,000 entries flower painters in addition to botanical artists over 1400 entries and, for the first time, garden designers.; Finally the Dictionary should have international appeal since so many botanists and gardeners worked on collective plants overseas, in particular in North America and the British Commonwealth.; Each entry gives, wherever possible, details of dates and places of birth and death, educational qualifications, professional posts, honours and awards, publications, location of plant collections, manuscripts, drawings and portraits. Its main function, however, is to provide further biographical references to books and periodicals. Comprehensive classified indices facilitate access by professions and activities, countries, and plant interests.

*Constructing, Reconstructing and Reclaiming Learner Identities* Ellen Preston Motohashi 2025-09-16 This book focuses on the experiences of 1.5 generation Filipinos in Japan, charting their life histories and educational experiences in both the Philippines and Japan. Against a background of transnational migrations between both countries, and varying levels of Japanese as a Second Language and educational support for immigrant/non-Japanese speaking children in Japanese schools, the author uses a narrative, life history approach to consider how the participants use their educational histories and learner identities as intangible resources upon which they drew to overcome the structural and cultural differences in the teaching-learning environments they encountered in Japanese schools. The book ends by recounting the participants' regained sense of confidence as learners upon entering university, where they reclaim their learner identities as active participants in the classroom, with several receiving awards for academic excellence.
