Identification, Evaluation, and Perceptions of Distance Education Experts

Kurubacak, Gulsun 2015-02-28
Instructional quality can make
or break the learning
experience, especially in digital
environments where the
expressional nuances of
interpersonal communication
are lost. The most effective
distance education instructors
and experts are those who
recognize the educational
needs of students and are able
to address those needs through
creative use of the
technological tools available to

them. Identification,
Evaluation, and Perceptions of
Distance Education Experts
explores the current and future
trends, needs, and priorities
that affect the development of
distance education in a
postmodern world. This
premier reference work will be
of significance to those
interested in online learning,
teaching and training,
communication, and education
across multiple sectors such as
universities, colleges, schools,
profit/non-profit e-
organizations, and e-
commerce.
