Histology: The Big Picture John F. Ash

2012-10-19 Get the BIG PICTURE of Histology - and zero-in on what you really need to know to ace the course and board exams! 400 FULL-COLOR ILLUSTRATIONS Medical Histology: The Big Picture is a different kind of study tool. With an emphasis on what you "need to know" versus "what's nice to know", and featuring more than 400 full-color illustrations and micrographs, it offers a focused, streamlined overview of human histology. You'll find a succinct, user-friendly presentation designed to make even the most complex concepts understandable in a short amount of time. With just right balance of information to give you the edge at exam time, this unique combination text and atlas features: An efficient, study-enhancing design consisting of text on the left-hand page and related illustrations on the right-hand page - allowing you to grasp individual principles, one concept at a time The inclusion of detail, often clinical in nature, that clarifies the link between the structural and functional applications of histology Review questions and answers at the end of each chapter A complete final exam at the end of the book Icons that indicate high-yield, clinically relevant concepts Key Structures highlighted when they first appear to indicate their importance More than 400 full-color illustrations and micrographs depicting essential histology Concise, easy-to-remember bulleted text

Young. Study Guide Lowell R. Ryan 1977
Chemistry (Teacher Guide) Dr. Dennis Englin

2018-02-26 This book was created to help teachers as they instruct students through the Master's Class Chemistry course by Master Books. The teacher is one who guides students through the subject matter, helps each student stay on schedule and be organized, and is their source of accountability along the way. With that in mind, this guide provides additional help through the laboratory exercises, as well as lessons, quizzes, and examinations that are provided along with the answers. The lessons in this study emphasize working through procedures and problem solving by learning patterns. The vocabulary is kept at the essential level. Practice exercises are given with their answers so that the patterns can be used in

problem solving. These lessons and laboratory exercises are the result of over 30 years of teaching home school high school students and then working with them as they proceed through college. Guided labs are provided to enhance instruction of weekly lessons. There are many principles and truths given to us in Scripture by the God that created the universe and all of the laws by which it functions. It is important to see the hand of God and His principles and wisdom as it plays out in chemistry. This course integrates what God has told us in the context of this study. Features: Each suggested weekly schedule has five easy-to-manage lessons that combine reading and worksheets. Worksheets, quizzes, and tests are perforated and three-hole punched — materials are easy to tear out, hand out, grade, and store. Adjust the schedule and materials needed to best work within your educational program. Space is given for assignments dates. There is flexibility in scheduling. Adapt the days to your school schedule. Workflow: Students will read the pages in their book and then complete each section of the teacher guide. They should be encouraged to complete as many of the activities and projects as possible as well. Tests are given at regular intervals with space to record each grade. About the Author: DR. DENNIS ENGLIN earned his bachelor's from Westmont College, his master of science from California State University, and his EdD from the University of Southern California. He enjoys teaching animal biology, vertebrate biology, wildlife biology, organismic biology, and astronomy at The Master's University. His professional memberships include the Creation Research Society, the American Fisheries Association, Southern California Academy of Sciences, Yellowstone Association, and Au Sable Institute of Environmental Studies.
