## **Climate Change 2022 - Mitigation of**

**Climate Change** Intergovernmental Panel on Climate Change (IPCC) 2023-08-17 This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change mitigation. The report assesses progress in climate change mitigation options for reducing emissions and enhancing sinks. With greenhouse gas emissions at the highest levels in human history, this report provides options to achieve net zero, as pledged by many countries. The report highlights for the first time the social and demand-side aspects of climate mitigation, and assesses the literature on human behaviour, lifestyle, and culture, and its implications for mitigation action. It brings a wide range of disciplines, notably from the social sciences, within the scope of the assessment. IPCC reports are a trusted source for decision makers, policymakers, and stakeholders at all levels (international, regional, national, local) and in all branches (government, businesses, NGOs). Available as Open Access on Cambridge Core.

**The Patient in the Family** Hilde Lindemann Nelson 2014-05-22 The Patient in the Family diagnoses the ways in which the worlds of home and hospital misunderstand each other. The authors explore how medicine, through its new reproductive technologies, is altering the structure of families, how families can participate more fully in medical decision-making, and how to understand the impact on families when medical advances extend life but not vitality.

**Handbook of Cities and Networks** Neal, Zachary P. 2021-07-31 This Handbook of Cities and Networks provides a cutting-edge overview of research on how economic, social and transportation networks affect processes both in and between cities. Exploring the ways in which

cities connect and intertwine, it offers a varied set of collaborations, highlighting different theoretical, historical and methodological perspectives.

## **Dog Behaviour, Evolution, and Cognition**

Adam Miklosi 2014-12-11 This is the first book to collate and synthesize the recent burgeoning primary research literature on dog behaviour, evolution, and cognition. The author presents a new ecological approach to the understanding of dog behaviour, demonstrating how dogs can be the subject of rigorous and productive scientific study without the need to confine them to a laboratory environment. This second, fully updated edition of Dog Behaviour, Evolution and Cognition starts with an overview of the conceptual and methodological issues associated with the study of the dog, followed by a brief description of their role in human society. An evolutionary perspective is then introduced with a summary of current research into the process of domestication. The central part of the book is devoted to issues relating to the cognitive aspects of behaviour which have received particular attention in recent years from both psychologists and ethologists. The book's final chapters introduce the reader to many novel approaches to dog behaviour, set in the context of behavioural development and genetics. This second edition recognises and discusses the fact that dogs are increasingly being used as model organisms for studying aspects of human biology, such as genetic diseases and ageing. Specific attention is also given in this edition to attachment behaviour which emerges between humans and dogs, the importance of inter-specific communication in the success of dogs in human communities and the broad aspects of social cognition and how this may contribute to human-dog cooperation. Directions for future research are highlighted throughout the text which also incorporates links to human and primate research by drawing on homologies and analogies in both evolution and behaviour. The book will therefore be of relevance and use to anyone with an interest in behavioural ecology including graduate students of animal behaviour

and cognition, as well as a more general audience of dog enthusiasts, biologists, psychologists, veterinarians, and sociologists.

Urban Political Economy Kenneth Newton

2013-11-07 The study of urban political economy needs no justification, for cities are the heart (and arguably the soul) of our civilization, and their political and economic conditions are the linchpins of its existence. But how should we study urban political economy? *Urban Political Economy* deals with different nations - Belgium, Denmark, France, Norway, the UK. and the USA - and with different problems - expenditure patterns, service provision, economic development, fiscal strain, budgetary cuts, and borrowing systems - but they all agree on two fundamental points about the study of their subject matter: first, that the urban economy cannot be understood outside its political context, just as urban politics cannot be understood without its economic background; and second, that the local and the national are knitted together so closely and so tightly that it is necessary to think of them as forming a single system. *Urban Political Economy* explores the idea of the fusion of factors by demonstrating the extent to which local and national conditions react upon one another to analyze the urban political economy.
