Behavioral Neuroscience George Spilich

2023-05-16 Behavioral Neuroscience by George Spilich, presents the neurophysiological aspects of behavior to the 21st-century, digital-native learner in the context of human experience, rather than in that of laboratory experiments with non-human animals. Whether a student has enrolled in the course to prepare them for a career in medicine or science, or they are fulfilling a general education science requirement, Behavioral Neuroscience is written to meet them where they are. The text has an accessible writing style, real-life examples and data sets, active-learning exercises, and multimodal media and quizzes—all designed to make the subject more engaging and relevant. This ground-breaking first edition is ideal for the Introductory Behavioral Neuroscience or the Biological Psychology course.

Evolution Nicholas H. Barton 2007 Evolution is designed to serve as the primary text for undergraduate courses in evolution. It differs from currently available alternatives in containing more molecular biology than is traditionally the case.
