So to Speak Shirley Koblner 2020-12-08 Engage with everyday expressions in a completely different (and fun!) way, with this entertaining and interactive book of common phrases that can turn a humdrum gathering into a raucous game night. We use expressions and idioms all the time. When you feel sick, you're "under the weather." When you feel great, you're "on top of the world." But whether you're a "smart cookie" or a tough one, you—and almost everyone you know—have a veritable smorgasbord of expressions stored deep in your brain. So to Speak: 11,000 Expressions That'll Knock Your Socks Off is the largest collection of its kind. Thoughtfully divided into sixty-seven categories—from Animals to Food & Cooking, from Love to Politics, this reference guide may have more in common with an activity book! Don't look for definitions and etymologies, because the book is just the beginning. So to Speak is the launchpad for your lifelong journey to explore the universe of expressions. In fact, it's designed to get readers off the page—and engaging with each other through word games and puzzles. So to Speak spurs discussion, debate, and play, while encouraging the art of listening and celebrating the joy of words. Authors Shirley and Harold Koblner spent more than half a century nurturing and teaching children. So to Speak is a reflection of their deeply held belief that regardless of a person's age, the most impactful learning happens when you're having fun. Whether it's grandparents teaching their favorite expressions to their grandkids, teens helping adults with the latest lingo or slang, or millennials indulging in their love of wordplay and games, this is the perfect book for any lover of language.

Building Family-School Partnerships in Secondary Math Shakiyya Bland 2026-01-27 When families join the equation, they inspire and empower every student mathematician Many secondary math educators feel the gap between home and school when it comes to engaging families in their students' mathematical development. While traditional "guardian involvement" often lessens after elementary school, research shows that authentic family engagement during the critical middle and high school years can significantly impact student success. Building Family-School Partnerships in Secondary Math offers a research-backed approach to bridging this divide, grounded in the Standards for Mathematical Practice, Math Language Routines, and Funds of Knowledge frameworks. This practical guide addresses the unique challenges of secondary mathematics education—from the cognitive and social changes students experience during adolescence to the increasing complexity of mathematical concepts. Rather than adding unrealistic demands to already busy teachers and caregivers, the book provides actionable strategies that honor the strengths and knowledge that educators, students, and families bring to the learning process. Key features include: Culturally responsive frameworks that connect students' lived experiences to powerful mathematical practices Ready-to-use templates for family letters, at-home activities, and communication tools Authentic vignettes showing successful family engagement in action across diverse communities Reflection questions and activities designed for both educators and families to use together Dr. Shakiyya Bland and Dr. Julitha Rials draw from their extensive experience in mathematics education and equity work to show how genuine partnerships can help students see math as relevant to their daily lives—whether through cooking, budgeting, construction, or community problem-solving. When families and educators collaborate meaningfully, mathematical thinking grows deeper and students develop stronger identities as capable mathematicians ready for future success.
