Who Fights for Reputation Keren Yarhi-Milo 2018-09-11 How psychology explains why a leader is willing to use military force to protect or salvage reputation In *Who Fights for Reputation*, Keren Yarhi-Milo provides an original framework, based on insights from psychology, to explain why some political leaders are more willing to use military force to defend their reputation than others. Rather than focusing on a leader's background, beliefs, bargaining skills, or biases, Yarhi-Milo draws a systematic link between a trait called self-monitoring and foreign policy behavior. She examines self-monitoring among national leaders and advisers and shows that while high self-monitors modify their behavior strategically to cultivate image-enhancing status, low self-monitors are less likely to change their behavior in response to reputation concerns. Exploring self-monitoring through case studies of foreign policy crises during the terms of U.S. presidents Carter, Reagan, and Clinton, Yarhi-Milo disproves the notion that hawks are always more likely than doves to fight for reputation. Instead, Yarhi-Milo demonstrates that a decision maker's propensity for impression management is directly associated with the use of force to restore a reputation for resolve on the international stage. *Who Fights for Reputation* offers a brand-new understanding of the pivotal influence that psychological factors have on political leadership, military engagement, and the protection of public prestige.

Social Studies for Secondary Schools Alan J. Singer 2008-10-26 This popular text advocates an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience, it offers systematic support and open, honest advice for new teachers, is conversational not pedantic, and provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter especially designed to help new teachers to address learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Trusting Enemies Nicholas J. Wheeler 2018-03-09 How can two states with enemy relations transform their relationship? Nicholas Wheeler argues that the discipline of International Relations has not done a good job of answering this question because its focus has been on the state and the individual levels of analysis. In this ground-breaking book, he argues for the importance of a new level of analysis in trust research the interpersonal relationships between state leaders. In doing so, he makes two key contributions. Firstly, developing a new theory of interpersonal trust that can be applied to the international level, and secondly, showing how this theory contributes to the literature on signalling in IR. The theory of interpersonal trust developed in the book provides a novel response to the central problem identified by signalling theory in IR: whether the receivers of signals interpret them in the way intended by their senders. The author argues that, in fact, trust between two leaders is causally prior to the accurate interpretation of the signals they send with the aim of communicating peaceful intent. Trust, therefore, does away with the problem of the ambiguity of signal interpretation. He goes on to examine exactly how a new relationship of trust emerges between two leaders who represent states with enemy relations: through face-to-face interaction and the crucial process of bonding between them that this makes possible. This powerful new theory of interpersonal trust is applied to three cases: the personal interactions between US and Soviet leaders Ronald Reagan and Mikhail Gorbachev in ending the Cold War; the face-to-face interactions between Indian Prime Minister Atal Bihari Vajpayee and Pakistani Prime Minister Nawaz Sharif in reducing conflict between India and Pakistan in 1998-1999; and the interactions in 2009-10 between Barack Obama and Ayatollah Ali Khamenei that failed to achieve a breakthrough in US-Iran nuclear relations.

The CIA and the Culture of Failure John M. Diamond 2008 The CIA and the Culture of Failure follows the CIA through a series of crises from the Soviet collapse to the war in Iraq and explains the political pressures that helped lead to the greatest failures in U.S. intelligence history.
