**Safety Management** Dan Petersen 2001 This book describes the essential elements of a behavior-based safety program as well as describing some of the barriers to full implementation. The author also discusses how to evaluate supervisory performance and training methods. Drawing on his training and experience in industrial psychology and organizational behavior, Dr. Petersen presents a model for teaching safe behavior and building a safe work environment. Approaches to encouraging greater participation in safety programs are examined. The author also examines what effects stress has on safe behavior, and the need for wellness programs. Substance abuse effects on worker behavior are explored and recommendations for developing an employee assistance program in substance abuse are presented -- From [www.amazon.com](http://www.amazon.com) website.

**Social Cognition** Gordon B. Moskowitz 2005-01-01 An ideal text for undergraduate- and graduate-level courses, this accessible yet authoritative volume examines how people come to know themselves and understand the behavior of others. Core social-psychological questions are addressed as students gain an understanding of the mental processes involved in perceiving, attending to, remembering, thinking about, and responding to the people in our social world. Particular attention is given to how we know what we know: the often hidden ways in which our perceptions are shaped by contextual factors and personal and cultural biases. While the text's coverage is sophisticated and comprehensive, synthesizing decades of research in this dynamic field, every chapter brings theories and findings down to earth with lively, easy-to-grasp examples.

**Co-Production and Public Service Management** Victor Pestoff 2018-10-03 This volume compiles a dozen essays, by one of the most prolific proponents of co-production as a solution for many of the challenges facing public services and democratic governance at the outset of the 21st Century. Co-production is considered a partnership between citizens and public service providers that is essential for meeting a growing number of social challenges, since neither the government nor citizens can solve them on their own. These challenges include, among other things, improving the efficiency and effectiveness of public services in times of financial strain; increasing the legitimacy of the public sector after decades of questioning its ability with the spread of New Public Management; promoting social integration and cultural pluralism in increasingly diverse societies when millions of refugees and immigrants are on the move; tackling the threat of burgeoning populism following the rise of anti-immigrant and anti-global parties in many countries in recent years; and finally, finding viable solutions for meeting the growing needs of aging populations in many parts of the world. This volume addresses issues related to the successful development and implementation of a policy shift toward greater citizen participation in the design and delivery of the services they depend on in their daily lives and greater citizen involvement in resolving these tenacious problems, facilitated by the active support of governments across the globe. Moreover, it explores participatory public service management that empowers the front-line staff providing public services. Together with users/citizens they can insure the democratic governance of public service provision.
