Nollet 2011-04-01 While muscle foods are the more commonly consumed portion of an animal, animal by-products such as the entrails and internal organs are also widely consumed. This handbook, unique in the world, provides food scientists with a full overview of the tools available for the analysis of these by-products. Known for their superior handbooks on processed meats and poultry, muscle meat, dairy, and seafood, editors Nollet and Todra take the same comprehensive approach. They bring together leading experts who look at the techniques and methodologies for analyzing nutritional and sensory

qualities as well as safety, including the detection of pathogens and toxins usually found in muscle foods.

Gene Transfer Theodore Friedmann 2007

Understanding gene function and regulation requires rigorous testing in live cells and organisms. Recent advances have provided a variety of new strategies for delivering DNA and RNA into cells and probing their expression, as well as new clinical applications that rely upon the introduction of genetic material. The vast number of available techniques for clinical and laboratory research often makes selecting the optimal method a difficult process. Gene Transfer: Delivery and Expression of DNA and RNA provides the first comprehensive guide to technical approaches for delivering nucleic acids into cells and organisms and of ensuring (even manipulating)

appropriate expression. The detailed, step-by-step protocols cover a variety of methods, both well established and newly evolving. These include viral and nonviral methods of gene delivery, transgenic approaches, strategies for the regulation of transgene expression, and modification of the host response. The introductory matter to each chapter includes concise technical and theoretical discussions with considerations for selection of the appropriate system and strategies for delivery.

15 years. This fourth edition continues to present a step-by-step guide to anaesthetic practice. It has been fully revised and updated to reflect current best practice in the management of almost every type of anaesthetic emergency. Examples include: • the latest cardiac arrest management guidelines from the Australian Resuscitation Council • management of the "Can't Intubate Can't Oxygenate" situation • the most current recommendations for the management of anaphylaxis from the ANZCA Anaesthetic Allergy Group. No other anaesthetic manual on the market is as compact, comprehensive and user friendly as the Westmead Anaesthetic Manual. It is the book you need when dealing with the complex, the unexpected and the dreaded in anaesthetic practice. Anthony P. Padley, MBBS (UNSW), FANZCA, is a Senior Staff Specialist Anaesthetist at Westmead Hospital and a VMO Anaesthetist at Westmead Private Hospital.
