Engineers in a Developing Country Rènette Du Toit 2009 The study provides a demographic analysis of employment trends across the public and private sectors of the economy, and investigates the demand for engineers, technologists and technicians in the workforce. A comprehensive analysis of the educational context for engineering professionals focuses on enrolment, graduation and throughput trends in all engineering disciplines at universities and universities of technology, and reveals that although there have been positive innovations in education and training strategies in recent years, many issues, especially at secondary school level, remain a challenge. Women in engineering is a particular focus of this study, which devotes a chapter to examining the factors that influence their choice of career, the barriers they experience in the labour market and strategies for encouraging women into the profession. This comprehensive monograph offers valuable quantitative and qualitative information about engineering capacity across all engineering disciplines in South Africa. It is therefore an important reference for all engineering academics as well as decision-makers in both the private and public sectors, and will be useful to aspiring and current engineering students, whatever their field.

Social Work in Social Change Nicci Earle 2008 This study forms part of a series of studies on professions and professional education being conducted by the HSRC's research programme on Education, Science & Skills Development. It follows a pilot study on medical doctors, published in 2006 entitled *Doctors in a Divided Society: The profession and education of medical practitioners in South Africa*. Like the other studies

in the series, this study involved developing an understanding of the professional milieu and professional labour market of social workers. As the implementers of government social policy, social work professionals have been at the forefront of grappling with the practicalities of the changes in focus, approach and methods of social security and social service delivery since 1994. It examines developments in the education and training of social workers within the democratic dispensation, the most significant of which is the development of a national, standardised Bachelor of Social Work degree. The study also reveals that the dominant profile in student enrolment and graduation statistics has changed from white female to African female, and that enrolment has increased significantly. However, the study also shows that graduation trends have been negative and losses due to emigration are an additional concern. Given the scarcity of these professionals against the demand for their services, understanding the factors that contribute to this picture are critical to effective intervention.

Homeschooling High School Shirley Erwee 2014-08-28 Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South

Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeschooled graduates. Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond.

Financing Higher Education Worldwide D. Bruce Johnstone

2010-06-07 Examines the universal phenomenon of cost-sharing in higher education -- where financial responsibility shifts from

governments and taxpayers to students and families. Growing costs for education far outpace public revenue streams that once supported it.

Even with financial aid and scholarships defraying some of these costs, students are responsible for a greater share of the cost of higher

education. Shows how economically diverse countries all face similar cost-sharing challenges. While cost-sharing is both politically and

ideologically debated, it is imperative to implement it for the financial health of colleges and universities From publisher description.

Fees Must Fall Susan Booyesen 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African

#FeesMustFall revolt #FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to, and financial

exclusion from, higher education in South Africa. More broadly, it

radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation

movement. The 2015 revolt links to national and international youth

struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet, its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical, top-down leadership system of university management and it's 'double speak' of professing to act in workers' and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the #FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.
