**Digestive System (Humans) (Speedy Study Guide)** Speedy Publishing LLC 2014-06-10 The human digestive system works by introducing water and enzymes into food in order to extract nutrients and minerals from it. This process is assisted by smooth, involuntary muscles along the tract that help push food along. All waste products are excreted at the end of the digestive cycle. Charts that show the inner workings of the digestive system make it easier for students to visualize precisely how the process works. This may be easier for some people to understand by visualization, rather than relying on written descriptions.

2015-04-25 The digestive system is where food gets converted into the energy that your body needs. But the digestive system is seen as not as important as the other systems in the body thereby leading to its abuse. This quick study guide can be used as reference to the important functions of the digestive system. Complete with infographics, this is the book you need to have.

Humans require a series of organs to effectively turn the food we eat into the energy our body needs. An informational pamphlet would greatly benefit a biology student in that it would be an overview of the necessary basics that the student can then build off of in future studies.
