User's Guide: 2-D Frame Analysis Link Program (LINK2D) Chris A. Merrill 1987 This two-dimensional (2-D) frame analysis link program, LINK2D, provides the external link necessary for bridging the gap in data from rudimentary analysis design capabilities to data from more advanced structural analysis/design computer programs. The newly created data base could thereby be used throughout the building design process. Data generated in STRUCTURE, a module of the Computer-Aided Engineering and Architectural Design System (CAEADS), have been used to create input data for CFRAME and/or the 2-D capability of

GTSTRUDL. CFRAME is a product of the computer-aided Structural Engineering (CASE) project and GTSTRUDL is a proprietary software program developed by and for the benefit of the Georgia Institute of Technology.
