Health Promotion and Disease Prevention for Advanced Practice: Integrating Evidence-Based Lifestyle Concepts Loureen Downes 2023-09-29 Health Promotion and Disease Prevention for Advanced Practice: Integrating Evidence-Based Lifestyle Concepts is a unique new resource that is not afraid to address lifestyle concepts that

can change the trajectory of healthcare in the United States and globally. It provides practical, evidence-based approaches to reduce the pandemic of preventable lifestyle-related chronic diseases such as heart disease, hypertension, some strokes, type 2 diabetes, obesity, and multiple types of cancer. It provides nurse practitioners and physician assistants with the lifestyle management tools needed to contribute to a higher level of care to promote health and prevent disease. The authors take a deep dive into the literature regarding lifestyle concepts and practical management of lifestyle-related chronic diseases. They discuss the root causes of diseases and approaches for patient-centered care, strategies for health promotion reimbursement, and trending telehealth delivery of health care.

Evaluation of Gateway and Low-cost Traffic Calming Treatments for Major Routes in Small Rural Communities 2007

Many rural communities have developed around highways or major county roads; as a result, the main street through small rural communities is often part of a high-speed rural highway. Highways and county roads are characterized by high

speeds outside the city limits; they then transition into a reduced speed section through the rural community. Consequently, drivers passing through the community often enter at high speeds and maintain those speeds as they travel through the community. Traffic calming in small rural communities along major roadways is common in Europe, but the U.S. does not have experience with applying traffic-calming measures outside of major urban areas. The purpose of the project was to evaluate traffic-calming treatments on the major road through small Iowa communities using either single-measure low-cost or gateway treatments. The project was partially funded by the Iowa Highway Research Board (IHRB). The focus of the IHRB portion was to evaluate single-measure, low-cost, traffic-calming measures that are appropriate to major roads through small communities. The research evaluated the use of two gateway treatments in Union and Roland; five single-measure treatments (speed table, on

pavement "SLOW" markings, a driver speed feedback sign, tubular markers, and on-pavement entrance treatments) were evaluated in Gilbert, Slater, and Dexter.

The CME's Guide to the DOT Physical Exam

David A. Thorpe 2013-01-01 The "NRCME Study Guide" is the premier study guide available today to assist (multi-disciplinary) health care providers preparing to sit for the certification examination for the National Registry of Certified Medical Examiners. Prepared so that all defined categories identified by the NRCME as areas tested, are organized for easy reference and study. Categories include: The Health Driver Physical and Certification Regulations to Remember Documentation Certification Periods Waiting Periods Required Medical Clearance Required and Recommended Testing Counseling Requirements Waivers, Exemptions and SPEDisqualifying Conditions (Temporary and Permanent) Disqualifying Medications and Medications of Concern NRCME

Practice Test. Each section and its components contain page references (in parentheses) to "The CME's Guide to the DOT Physical Exam" so that the candidate may expand on their understanding of each category and condition. A 50-question practice test with answers is included to further assist the candidate in their preparation to take and pass the certification examination. Subscribers may purchase at discounted pricing.
