Handbook of Fathers and Child Development Hiram E. Fitzgerald 2020-10-01 This handbook provides a comprehensive review of the impact of fathers on child development

from prenatal years to age five. It examines the effects of the father-child relationship on the child's neurobiological development; hormonal, emotional and behavioral regulatory systems; and on the systemic embodiment of experiences into the child's mental models of self, others, and self-other relationships. The volume reflects two perspectives guiding research with fathers: Identifying positive and negative factors that influence early childhood development, specifying child outcomes, and emphasizing cultural diversity in father involvement; and examining multifaceted, specific approaches to guide father research. Key topics addressed include: Direct assessment of father parenting (rather than through maternal reports). The effects of father presence (in contrast to father absence). The full diversity of father involvement. Father's impact on gender role differentiation. Father's role in triadic interactions of family dynamics. Father involvement in psychotherapeutic family interventions. This handbook draws from converging perspectives about the role of fathers in very early child development, summarizes what is known, and, within each chapter, draws attention to the critical questions that need to be answered in coming decades. The Handbook of Fathers and Child Development is a must-have resource for researchers, graduate students, and clinicians, therapists, and other professionals in infancy and early child development, social work, public health, developmental and clinical child psychology, pediatrics, family studies, neuroscience, juvenile justice, child and adolescent psychiatry, school and educational psychology, anthropology, sociology, and all interrelated disciplines.

Head Start Impact Michael J. Puma 2006 Since its beginning in 1965 as a part of the War on Poverty, Head Start's goal has been to boost the school readiness of low-income children. Based on a 'whole child' model, the program provides comprehensive services that include pre-school education; medical, dental, and mental health care; nutrition services; and efforts to help parents foster their child's development. Head Start services are designed to be responsive to each child's and family's ethnic, cultural, and linguistic heritage. The Congressionally-

mandated Head Start Impact Study was conducted across 84 nationally representative grantee/delegate agencies. Approximately 5,000 newly entering 3- and 4-year-old children applying for Head Start were randomly assigned to either a Head Start group that had access to Head Start program services or to a non-Head Start group that could enrol in available community non-Head Start services, selected by their parents. Data collection began in fall 2002 and is scheduled to continue through 2006, following children through the spring of their 1st-grade year. The study quantifies the impact of Head Start separately for 3- and 4-year-old children across child cognitive, social-emotional, and health domains as well as on parenting practices. This book is essential reading for those in the education field.

Conceptualizing Qualitative Inquiry Thomas H. Schram 2003 What to ask and how to ask it are the basic "problems" of qualitative research. This practical new book provides a means for first-time researchers to address these fundamental concerns and move their ideas through the process of conceptualizing and proposing a field-based qualitative study. Emphasizing the preliminary work-the "mindwork"-that should precede and inform any research project, the author poses the questions a first-time researcher would, and examines the frustrations and anxieties he or she might experience. He does this, first, through an ongoing case study of a real student researcher in her first project, and then by capturing "teachable" moments that focus on the how and why of researchers' efforts. The result? A framework within which readers can learn how to ask informed questions and uncover informative answers. KEY TOPICS Chapter topics cover engaging problem and purpose, establishing a perspective, constructing a conceptual context, forming research questions, deciding about traditions, getting into place for fieldwork, establishing an inquiry's integrity, and writing a proposal. For anyone who needs to conduct research.

Voices of African American Single Mothers of Young Children in Child Care Dr. Bridget Turner 2020-10-05 The data and research study that is referred to in this book and done on the African American Single Mothers, can offer

support for all mothers seeking positive caregiving and building positive relationships with their child/children. Also, the data from the study referred to in this book, revealed that, once the mothers were aware of reflective functioning and had opportunities to practice it, their relationships with their children improved. Based on the mother's comments, maternal reflective functioning changed maternal responses and interactions with children as it required the mothers to examine their thoughts and feelings. To support positive social-emotional development of a child, it is important for the caregiver to be available and to have a positive, intimate, caring relationship with the child. Greenspan (1979) stated that, from conception through the lifespan, positive caregiving relationships are important to children's positive growth and development.
