The Global Edge Prof. Alejandro Portes 2018-09-11 Over the last quarter century, no other city like Miami has rapidly transformed into a global city. The Global Edge charts the social tensions and unexpected consequences of this remarkable process of change. Acting as a follow-up to the highly successful City on the Edge, The Global Edge examines Miami in the context of globalization and scrutinizes its newfound place as a major international city. Written by two well-known scholars in the field, the book examines Miami's rise as a finance and banking center and the simultaneous emergence of a highly diverse but contentious ethnic mosaic. The Global Edge serves as a case study of Miami's present cultural, economic, and political transformation, and describes how its future course can provide key lessons for other metropolitan areas throughout the world.

Handbook of BRICS and Emerging Economies P. B. Anand 2021 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies, with some even proclaiming that the promise of the BRICS (comprising Brazil, Russia, India, China, and South Africa) is over. However, the so called 'arranged marriage' still seems to be working well, with the club having become a formal international forum, with summit declarations, ministerial meetings, and numerous BRICS-wide fora. Is this euphoria misplaced? Is there a BRICS model of economic and human development? Are inequalities increasing and is this the denouncement of the economic successes? The Handbook of BRICS and Emerging Economies presents a comprehensive and multi-faceted analysis of the BRICS countries and other emerging economies, exploring their economic, social, environmental, and governance dimensions and other challenges. It brings together multi-disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS, how BRICS are impacting African economies, and how other emerging economies (including Chile, Mexico, Turkey, and others in Africa and Central Asia) compare. It observes the impact of governance challenges both within individual countries and in the forum for co-operation amongst them, what issues related to gender and identity based violence are prevalent, and what the security implications are and the role of BRICS is in contributing to peace keeping operations.

Congressional Record United States. Congress 1974 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Climate Change and Cities Cynthia Rosenzweig 2018-03-29 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

After the Flood A. H. Hay 2016-03-01 When disaster strikes, the amount of planning done ahead of time will dictate how quickly a system can recover and return to normal. Even the largest and most complex organizations can experience upset and disruption, whether by flood, fire, power failure, earthquake, or anything else that life can throw at us. Resiliency, like any other performance measure, can be designed into

businesses, institutions, communities, cities, and even countries. This is a book about implementing that planning before it's too late, and about learning to pick up and get going after a fall. Join Marianne as she explores the world of modern infrastructure technology within the context of a job with real threats, exciting opportunities, and throbbing headaches. With her, we learn what resilience means to a city or company, how to assess hazards and plan for continuity, and how effective system design can reduce the impact of disasters. From the basic concepts and terms to how they fit into real systems, After the Flood is a clear and engaging introduction to resilience planning for students, industry practitioners, or anyone interested in infrastructure, business continuity, and emergency and risk management.

Bridging Science And Policy Implication For Managing Climate Extremes Hong-sang Jung 2017-12-19 Since 1980, the number of climate-related disasters has been greatly increased globally. Scientific consensus based on the IPCC fifth report suggested that global warming would bring more intense and frequent extreme climate events. These climate-related disasters hinder the achievement of sustainable economic growth and prosperity by disrupting supply chains, impeding production, destroying infrastructure, and necessitating high-cost rebuilding and recovery. To mitigate the climate extreme risks and possible losses, it is essential to maximize the utilization of scientific outputs and to share best practices in disaster risk management. Aligned with such purposes, Asia-Pacific Economic Cooperation (APEC) Climate Center (APCC) hosts the APEC Climate Symposium (APCS) every year. APCS focused on drought prediction and management in 2013, climate extremes and hydrological disaster in 2014, and efficient use of climate information for disaster risk management in 2015. This book aims to compile some of the important results from the latest research in climate extreme prediction and services and its application studies with a focus on climate extremes such as typhoons, droughts, and floods based on the APCS presentations during 2013-2015.

Urban Regeneration and Neoliberalism Clare Kinsella 2020-10-29 This book explores the concept of 'home' in Liverpool over phases of 'regeneration' following the Second World War. Using qualitative research in the oral history tradition, it explores what the author conceptualises as 'forward-facing' regeneration in the period up to the 1980s, and neoliberal regeneration interventions that 'prioritise the past' from the 1980s to the present. The author examines how the shift towards city centre-focused redevelopment and 'event-led' initiatives has implications for the way residents make sense of their conceptualisations of 'home', and demonstrates how the shift in regeneration focus, discourse, and practice, away from Liverpool's neighbourhood districts and towards the city centre, has produced changes in the ways that residents identify with neighbourhoods and the city centre, with prominence being given to the latter. Employing Pierre Bourdieu's concepts of habitus and field as mechanisms for understanding different senses of home and shifts from localised views to globalised views, this book will appeal to those with interests in urban sociology, regeneration, geography, sociology, home cultures, and cities.
