William F. Samuelson

2024-11-26 The new edition of the best-selling managerial economics textbook, extensively updated to reflect current examples, data, and research Now in its tenth edition, Managerial Economics introduces the complex decision problems facing today's managers, equipping undergraduates, MBAs, and executives with the economic knowledge and analytical skills required to solve these problems. first, "Can a New Research Library be All-Digital?" By Lisa Spiro and Geneva Henry, explores the degree to which a new research library can eschew print. The second, "On the Cost of Keeping a Book," by Paul Courant and Matthew "Buzzy" Nielsen, argues that from the perspective of long-term storage, digital surrogates offer a considerable cost savings over print-based libraries. The final report, "Ghostlier Demarcations," examines how well large text databases being created by Google Books and other mass-digitization efforts meet the needs of scholars, and the larger implications of these projects for research, teaching, and publishing. The reports are introduced by Charles Henry; the volume includes a conclusion by Roger Schonfeld and an epilogue by Charles Henry. (Individual articles contain tables, figures, and footnotes.).
