Bringing Technology Education
Into K-8 Classrooms Edward
Britton 2005-03-02 "Are
published curriculum materials
really standards-based? The
authors answer this in
unprecedented detail. A must-
read for technology, design,
and engineering educators." --
William E. Dugger, Director
Technology for All Americans
Project, International
Technology Education
Association "If you enjoy
teaching science because it
engages students, you will
want to include technology and

design. This book provides
everything you need to find
curriculum materials that fit
your situation. Helping
students become
technologically literate as well
as scientifically literate is a
must in our world." --Senta A.
Raizen, Director National
Center for Improving Science
Education (NCISE)/WestEd
Bring a whole new world of
technology education into
every classroom! We live in a
world where technological
advances happen daily. But
technology is more than
computers and electronic
devices. Technology
encompasses every man-made
creation that meets human
needs, even a pencil or a book.
Technology education helps
students design and make
improvements in the designed
world around us, such as
transportation systems,
manufacturing, and
biotechnology, as well as many

other fields. This must-have guide is the first independent review of curriculum materials for technology. In *Bringing Technology Education Into K-8 Classrooms*, authors Edward Britton, Bo De Long-Cotty, and Toby Levenson provide a practical guide to the latest technology textbooks and integrated resources (including technology and supplementary resources), and descriptions of more than 100 informal resources. The guide fully describes the strengths and weaknesses of each product's features by analyzing the technology topics covered, types of technology design activities, assessment strategies, types of teacher support, and much more. *Bringing Technology Education Into K-8 Classrooms* includes: An introduction to technology education and its importance for students today Complete information for choosing technology resources that meet district and classroom needs Practical analysis of how technology topics address standards Helpful tips on how

technology activities help students understand a design process Featuring an easy-to-follow organization and sample pages from major products, this resource will help all students become technologically literate!
