**Educational Psychology** Jennifer L. Martin 2019-09-09 A comprehensive introduction to educational psychology, this volume is inclusive of all of the essentials—covering history, profiles, theories, applications, research, case studies, current events, issues, controversies, and more. Focused on human learning and teaching, the field of educational psychology informs a range of educational challenges, including instructional design, curriculum development, organizational learning, special education, student motivation, and classroom management. In this book, two veteran professors in the fields of education and psychology, offer a clear and concise yet comprehensive overview of this growing specialty. This volume will be valuable not only to university students aiming to understand psychology's subfields and to choose a major or a specialty, but also to classroom teachers, school administrators, and school social workers aiming to make teaching more effective and learning more thorough and lasting. Topics include the field's history, primary figures theories, research, theories, applications, issues, and controversies. Authors Martin and Torok-Gerard also explain current issues of social justice and educational equity, citing means that have been used to meet those goals in schools. The text additionally analyzes special education as a civil rights issue as well as equity and fairness for LGBTQ+ students in the context of social justice. The text ends with emerging research and predictions for the future of educational psychology.

Child behavior; a critical and experimental study of young children

Florence Edna Mateer 1918 "Child Study" is a term so well-worn and so widely used that its application and meaning in any one instance consequently needs definition. In this discussion, it will be used to indicate the observations of and the experimentations upon the mental processes of children under school age, as expressed in their behavior or reaction to stimuli and ascertained under conditions permitting repetition and verification. Further, various issues concerning learning, memory, and language, studied in connection with full recognition and evaluation of the physical organism, the environmental conditions, and the past experiences of the child, will be taken into consideration. Also, the problem undertaken, whatever it is, will be correlated with and compared with similar studies on older children. Specifically, the text sets out formulate a basis for a science of Child Behavior by answering the following questions: What work has been done and what results have been obtained regarding the mental development of the young child? To what extent do these investigations fail and what are the reasons for

their errors? What improvements in technique, apparatus and method can be made in the new work to be done?"--Intro. (PsycINFO Database Record (c) 2005 APA, all rights reserved).
