Trivium in Practice Martin Robinson 2016-06-10 Trivium in Practice brings together a series of case studies written by educators who were inspired by Martin Robinson's first book, Trivium 21c. Taken together, these case studies reveal how, regardless of setting or sector, the trivium can deliver a truly great education for our children. Great teaching has the three elements of the trivium at its centre. Grammar: foundational knowledge and skills. Dialectic: questioning, thinking and practising. Rhetoric: the ability to express oneself beautifully, persuasively and articulately in any form. The trivium is a helpful way for a teacher to think about the art of teaching. Through the model of the trivium traditional values and progressive ideals can coexist; both knowledge and cultural capital matter and skills are interwoven with content. The

trivium isn't a gimmick to be imposed on to a curriculum; it is a tried and tested approach to education. It is the key to great teaching and learning, as this group of educators discovered. The case studies are from Tom Sherrington, Sam Gorse, Nick, David Hall, Nigel Matthias, Nick Barnsley, Mike Grenier, Nick Rose and Carl Hendrick. These educators have found that trivium education has brought a range of tangible benefits for their students. These include: greater confidence, enhanced development of rigorous analytical skills, improved oracy and confidence in speaking in front of audiences, an appreciation of the value of acquiring and applying knowledge, refined skills in questioning and debating, developed creativity, independence and critical thinking, the ability to form and express considered opinions and, importantly, the

enjoyment of learning. Fundamentally, these educators have found that the trivium has helped them to define and deliver their ideas about the education they want for their students, helping them to become engaged, lifelong learners in the process. There is no one 'right' way to 'do' the trivium: it is a tradition that can be adapted. It is the art of education and engages teachers in the art of being educators. Just as each great artist learns from a tradition and refashions it, adds to it, disrupts it, so do the teachers who have contributed to this book. On their canvas, in their school, each contributor is creating and re-creating trivium education in their own way. Discover the potential of the trivium and be inspired to do the same in your own classroom. Suitable for teachers and leaders in any educational setting.

perspectives, each chapter explores the question of how mathematics comes to matter. Of interest to scholars across the usual disciplinary divides, this book tracks mathematics as a cultural activity, drawing connections with empirical practice. Unlike other books in this area, it is highly interdisciplinary, devoted to exploring the ontology of mathematics as it plays out in different contexts. This book will appeal to scholars who are interested in particular mathematical habits - creative diagramming, structural mappings, material agency, interdisciplinary coverings - that shed light on both mathematics and other disciplines. Chapters are also relevant to social sciences and humanities scholars, as each offers philosophical insight into mathematics and how we might live mathematically.

High Impact Practices in Higher Education Enakshi Sengupta 2023-09-27 Collating various case studies, policies and other real-world research, this book examines effective

high impact learning practices and demonstrates approaches that promote learning communities and common intellectual experiences.

Agency in Multilingual Education Policy and Planning in Asia

Syed Abdul Manan 2025-10-13 Manan and Hajar invite experts and seasoned researchers from Asian contexts to explore the nuanced dynamics of language policy and educational practices in Asia, underscoring the importance of understanding local agency at a micro-level. The chapters engage in the critical exploration of the tensions between structure and agency, and spotlight the institutional constraints these micro-level actors face in the enactment of multilingual education policy and planning. The contributors' chapters provide case study examples of the response of local actors towards policies at the micro-level when creating potential spaces for multilingual pedagogies and possible affirmation of multilingual identities. It also

provides an analysis of how and why micro-level actors engage in exercise of their agency, and what motives drive them towards such responses. The volume serves as a challenge to, and hopes to change, the normative assumptions, pervasive postcolonial hierarchies, and hierarchical multilingualism in favour of more egalitarian and inclusive multilingual policies and practices, both within and outside, the classroom. More specifically, the volume shares significant developments occurring around the role of agency in negotiating the prevailing Anglophonic and Anglonormative trends and practices. This book will be of value to researchers and postgraduate students working in the fields of language policy and planning, multilingualism and language education.
