Company Strategies and Organisational Evolution in the Automotive Sector Francesco Garibaldi 2005 This book is published during a phase of crisis and transformation for the automobile industry across the world; this crisis is particularly acute in Europe and the United States. The book is written especially for the non-specialist with more than a passing interest in the sector, such as experts of other sectors, trade unionists, representatives of the corporate world, policymakers and public managers who deal with industry, commerce and public planning. The authors provide up-to-date information and assessments of what is actually taking place, with particular attention paid to the sub-supply companies. The main focus lies on four European countries, Germany, Spain, Sweden and Italy, each of which is significant for its different experiences. Finally, three important non-European situations, the United States, Brazil and Japan, are examined.

Automotive User Interfaces Gerrit Meixner 2017-02-27 This book focuses on automotive user interfaces for in-vehicle usage, looking at car electronics, its software of hidden technologies (e.g., ASP, ESP), comfort functions (e.g., navigation, communication, entertainment) and driver assistance (e.g., distance checking). The increased complexity of automotive user interfaces, driven by the need for using consumer electronic devices in cars as well as autonomous driving, has sparked a plethora of new research within this field of study. Covering a broad spectrum of detailed topics, the authors of this edited volume offer an outstanding overview of the current state of the art; providing deep insights into usability and user experience, interaction techniques and technologies as well as methods, tools and its applications, exploring the increasing importance of Human-Computer-Interaction (HCI) within the automotive industry Automotive User Interfaces is intended as an authoritative and valuable resource for professional practitioners and researchers alike, as well as computer science and engineering students who are interested in automotive interfaces.

Encyclopedia of Transportation Mark Garrett 2014-08-13 Viewing transportation through the lens of current social, economic, and policy aspects, this four-volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas, including geography, public policy, business, and economics. The book's articles, all written by experts in the field, seek to answer such questions as: What has been the legacy, not just economically but politically and socially as

well, of President Eisenhower's modern interstate highway system in America? With that system and the infrastructure that supports it now in a state of decline and decay, what's the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high-speed rail that every expert says—despite the allure—will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features: Approximately 675 signed articles authored by prominent scholars are arranged in A-to-Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context; a Reader's Guide organizes entries by broad topical or thematic areas; a detailed index helps users quickly locate entries of most immediate interest; and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full, well-rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader's Guide, and cross references combine for thorough search-and-browse capabilities in the electronic edition. Available in both print and electronic formats, Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

Chasing Chi James E. Gaylord 2025-12-16 Espionage, betrayal, and the FBI's historic victory—this is the true story of the hunt for Chi Mak and his spy ring. It began as furtive tip, grew to fevered investigation, and climaxed with midnight airport arrests to prevent US military secrets from being lost forever, and it all centered around a diminutive, bespectacled engineer from Kwang-Tung, China. Who was Chi Mak? A brilliant immigrant engineer eager to live in the West and enjoy the fruits of his labor? Or Mao's Marxist soldier, itching to steal US Navy secrets to leapfrog China's navy to parity with, and eventual supremacy over, America's Seventh Fleet? Chasing Chi is a compelling read and first-person account of the trailblazing investigation and prosecution of Chi Mak and his family and friends. For decades, they stole sensitive US military and commercial technologies for the Peoples' Republic of China. FBI Special Agent James Gaylord, who directed the investigation, recounts this mesmerizing tale by drawing upon his eyewitness experiences and notes, case evidence, investigative files, and court records to weave a fascinating spy thriller detailing Chi Mak's betrayal. This incredible true-life story highlights behind-the-curtain intrigues, obstacles, betrayals, and hard-won victories, while pointing out the heroes and villains along the way. Overcoming bureaucratic friction, cowardice, and sabotage jeopardizing their efforts at every turn, Special Agent Gaylord and his squad, call sign "SARA-4," persevered, breaking the FBI's historic string of failures, producing the most successful prosecution of China's spies ever, and re-writing the manual for convicting foreign agents.
