Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence-based pedagogies in higher education, at something a level approaching large-scale impact. By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation, we aim to change the conversation and focus on how we work and learn together - i.e. extending the implementation and knowledge of co-design methods. In this first edition of our Research Topic on Active Learning, we highlight two (of the three) types of publications we wish to promote. First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community. These types of studies constitute the "practice pull" that we see as a necessary counterbalance to "knowledge push" in a more productive pedagogical innovation ecosystem based on research-practitioner partnerships.

Second are studies empirically examining the implementations of evidence-based designs in naturalistic settings and under naturalistic conditions. Interestingly, the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as “in-betweens” straddling the two worlds. As a result, these publications represent both the rigours of research and the pragmatism of reflective practice. In forthcoming editions, we will add to this collection a third type of publication -- design profiles. These will present practitioner-developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners, instructional designers and researchers alike. We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner-researcher interactions that promote co-design in pedagogical innovation.

Frontiers of Fundamental Physics FFP16 Ekrem Aydiner 2024-05-17 This book is a collection of contributions presented at the 16th annual international symposium “Frontiers of Fundamental Physics” (FFP16), supported by Istanbul University. As a document of the latest occurrence of this very important gathering, it presents the most recent advances in fundamental physics and physics teaching. For nearly fifteen years, the FFP has attracted some of the greatest physicists in the world. The broad objective of the entire endeavor has been to enable scholars working in slightly different areas to meet on a single platform. Even with this particular year’s safety restrictions arising from Covid, we feel that the general mission has been carried out as fully as in any year. The book features addresses given by a host of expert contributors, all of which are organized according to seven individual themes. The areas covered include Astronomy and Astrophysics, Particle Physics, Theoretical Physics, Gravitation and Cosmology, Computational Physics, Condensed Matter Physics, Complex Systems and related areas. This book should prove to be a veritable bounty for anyone with an interest in the continued evolution of our understanding of the physical world.

Distance Learning Michael Simonson 2016-06-01 Distance Learning is for leaders, practitioners, and decision makers in the fields of distance learning, e'learning, telecommunications, and related areas. It is a professional journal with applicable information for those involved with providing instruction to all kinds of learners, of all ages, using telecommunications technologies of all types. Stories are written by practitioners for practitioners with the intent of providing usable information and ideas. Articles are accepted from authors - new and experienced - with interesting and important information about the effective practice of distance teaching and learning. Distance Learning is published quarterly. Each issue includes eight to ten articles and three to four columns, including the highly regarded "And Finally..." column covering recent important issues in the field and written by Distance Learning editor, Michael Simonson. Articles are written by practitioners from various countries and locations, nationally and internationally. Distance Learning is an official publication of the United States Distance Learning Association, and is co-sponsored by the Fischler School of Education at Nova Southeastern University and Information Age Publishing.

Leadership for Increasingly Diverse Schools George Theoharis

2015-03-12 Leadership for Increasingly Diverse Schools provides both practicing and aspiring leaders with the theory, research, and practical guidance to lead socially just schools. Today's schools are growing more pluralistic and diverse, and leadership is central to reversing long-standing trends of educational inequities, exclusion, and disparate school outcomes. This book helps readers sharpen their awareness of how multiple dimensions of diversity intersect as well as develop strategies for working with students of all socioeconomic statuses, races, religions, sexual orientations, languages, and special needs. Leadership for Increasingly Diverse Schools provides school leaders the tools to foster teaching and learning environments that promote educational equity and excellence for all students. Special Features: Each chapter focuses on a specific dimension of diversity and discusses intersectionality across other areas of difference, including ability/disability, linguistic diversity, race, socioeconomic status, sexual orientation, gender, religion, and social frontiers. Chapters synthesize literature, provide practical strategies and tools, and include school-level and district-level cases illustrating inclusive leadership. End-of-chapter resources point readers toward further discussion of conceptual elements, practice connections, and research applications. A companion website features modifiable downloads and further resources for each chapter.
